RESOLUTION ON THE REPORTS ON THE MUNICIPAL ADMINISTRATION OF CALCUTTA FOR THE YEARS 1918-19, 1919-20 AND 1920-21.

CALCUTTA, THE 19TH MAY 1922.

RESOLUTION— No.3081M.

READ—

The reports on the municipal administration of Calcutta for the years 1918-19, 1919-20 and 1920-21, together with the reviews of the reports recorded by the General Committee and the Corporation.

Introductory.—This resolution deals with the administration of the Corporation of Calcutta during the three years ending the 31st March 1921.

In their previous triennial review, Government observed that its large revenue balances had enabled the Corporation to surmount the financial difficulties which the war had created. No restoration of normal conditions is however yet in sight; trade and industry are depressed and the universal rise in prices have added permanently to the establishment charges of the Corporation and perhaps permanently to the cost of its works. A loan policy has again become practicable, but loan charges have enormously increased, while the remaining borrowing capacity of the Corporation is largely earmarked for its costly water supply and drainage outfall schemes. The rates constantly grow, the annual increase being about Rs. 5 lakhs, but the new water supply scheme alone—in working expenses and loan charges—is expected to absorb nearly Rs. 20 lakhs of revenue a year.

Increased establishment charges, organization and expansion of primary education and the enhanced cost of the city services, add to the bill. If the Corporation is to continue the progressive and enterprising policy of the past decade, an increase in the rates would in the near future appear inevitable. Nevertheless, at the end of the triennium under review, the closing balance of the Corporation still reached the high figure of Rs. 46 lakhs, which has for the moment enabled it to defer the raising of the rates.

The Calcutta Municipal Bill of 1917 and the shorter Bill which was framed subsequently, were both dropped. The constitutional provisions of the former Bill have since been modified, and at the time of writing, this comprehensive consolidating measure is pending before the Legislative Council.

2. **Elections.**—The seventh general election of Ward Commissioners which was held on the 21st March 1921, evoked very little enthusiasm. There were 49,060 voters with 124,271 votes, as compared with 35,153 voters and 90,907 votes in 1918. The voters however showed little keenness and the votes cast were only 38 per cent. of the voting power of the contested wards as against 53 per cent. in 1918. In 15 wards out of 25 there was no contest at all, and it was only in three wards that any real keenness was evinced. In 18 wards the sitting members were returned and 11 of them without any opposition. The newly constituted body of Ward Commissioners consists of 23 Hindus and 2 Jews. No European, Anglo-Indian or Muhammadan candidates offered themselves for election.

3. **Census.**—The census which was taken on the 18th March 1921, was disappointing. Including the port and the maidan, the preliminary total for Calcutta was 903,173 as against 896,067 in 1911, an increase of less than 1 per cent. against 5·7 and 24·3 per cent. at the two preceding censuses. The accuracy of the census was challenged by the Corporation which had further enquiries made to test the figures in certain areas where the census had showed a decrease of population.

The census of Calcutta has always presented peculiar difficulties—more especially in the wards in which Europeans preponderate.

4. **Accounts.**—The resumption of activity in nearly all the departments of the Corporation resulted in a considerable increase of work in the Accounts Department of the Corporation. Greater attention was paid to the verification of stocks and shares and a board of visitors was appointed in 1919-20 to inspect periodically the Store Depôts of the Corporation.

5. **Revenue.**—The actual receipts of the Corporation rose from Rs. 1,35,61,519 in 1918-19 to Rs. 1,52,22,180 in 1920-21 or by nearly 2·2 per cent., while the payments rose from 1,27,74,868 to Rs. 1,59,39,378, or by 24·7 per cent. Though the expenditure in 1920-21 exceeded the receipts by nearly 7½ lakhs, the triennium closed with an actual balance of Rs. 46,09,450. On the basis of assets and liabilities the income in 1918-19 was Rs. 1,35,69,257 and the expenditure Rs. 1,26,51,363, while in 1920-21 they amounted to Rs. 1,52,03,872 and Rs. 1,61,62,519, respectively, the closing balance being Rs. 34,01,257.

6. **Loans.**—Loans aggregating Rs. 54,54,700 fell due during the triennium and were repaid partly out of accumulations from the Sinking Fund

and partly by raising further loans to the extent of Rs. 35,73,200. The following new loans were sanctioned for capital works :—

					Rs.
1919-20	{ 24,92,500
1920-21	{ 21,24,500
					54,50,000

Of these loans it was not found necessary to raise the loan of Rs. 21,24,500 which was intended to serve as a reserve in case the realisation from the sale of surplus lands fell short of expectations. Of the other two loans for capital works, Rs. 35,73,200 only were raised in the aggregate, as it was found impossible to raise the loans on advantageous terms and it was eventually decided to keep in abeyance certain projects which were not urgent and to concentrate the future resources of the Corporation on the scheme for the improvement of the water supply.

The loan funds opened with a balance of Rs. 6,14,797. The total sum credited to the funds (*e.g.*, on account of loan receipts, sales of surplus, etc.) within the triennium amounted to Rs. 1,12,03,968 and the expenditure to Rs. 83,46,886. The balance left at the end of the period amounted to Rs. 34,71,879.

The net indebtedness of the Corporation on the 31st March 1921 excluding the accumulations in the Sinking Funds was Rs. 5,24,75,300 as against Rs. 4,75,17,000 on the 31st March 1918. This represents an increase of Rs. 49,58,300 in the debts of the Corporation compared with a decrease of Rs. 15,97,315 in their liability in the preceding triennium.

7. **Sinking Fund.**—The balance at the credit of the Sinking Funds on the 31st March 1921 amounted to Rs. 2,159 in cash and securities of the face value of Rs. 63,40,500 which at market value amounted to Rs. 42,55,233. To make good the temporary depreciation in the Sinking Funds the Corporation was required to pay a sum of Rs. 9,96,838 into fund during the period under review. The total loan charges on the outstanding debt of the Corporation on the 31st March 1921 amounted to Rs. 34,82,681 as against Rs. 31,82,980 on the 31st March 1918.

8. **Assessment.**—The assessed annual valuation of the city continued steadily to rise and stood at the end of the year 1920-21 at Rs. 5,60,60,063 as compared with Rs. 4,80,98,516 at the end of the year 1917-18. Of the total increase nearly half of the amount was obtained from general revision of assessment and the rest from revaluation and intermediate valuation of new constructions. The new assessment of the Port Commissioners' property yielded—after appeal—an increase of over Rs. nine lakhs in the annual valuation.

The steady increase in the valuation of the city will it is hoped help the Corporation to a considerable extent in financing the costly water supply and drainage schemes and other improvement schemes of importance.

9. **Collection.**—The high standard of collection reached in previous years was well maintained in the collection and license departments. In 1920-21 the percentage of collections for the consolidated rate calculated on the nett demand reached the figure 99·93, which is one of the highest on record. Similarly, the percentage of collection for the license department rose as high as 99·38 in the year 1918-19. The number of licenses issued and the record collections in the license department in 1920-21 in spite of the unfavourable conditions which have prevailed during the year, point to the steadily increasing prosperity of the city.

10. **Water-supply.**—The average quantity of water supplied to the city during the last year of the period under review rose to 68 million gallons per day (37 million filtered and 31 million unfiltered) with an average consumption of 74·2 gallons per head per day (40 filtered and 34·2 unfiltered). In accordance with the recommendations of a special committee appointed to

consider the question of improving the filtered water-supply of Calcutta, Mr. St. George Moore, an Engineer of considerable waterworks experience, was brought out from England to advise the Corporation on the subject. The scheme that was first drawn up by Mr. Moore was rejected by the Corporation on the score of cost. Eventually it was decided that the unfiltered water-supply should not be abolished and that the scheme be modified so as to provide for 70 million gallons of filtered and 40 million gallons of unfiltered water daily with adequate control of the filtered water supply by metering so as to maintain a continuous water-supply at a minimum terminal pressure of 40 feet. The scheme, which it is estimated will cost over two crores of rupees and will take five years to complete, has since been sanctioned by Government. The Minister trusts that as the deliberative stage in connection with the improvement of the water supply which began so far back as 1913 has now been satisfactorily concluded, there will now be no delay in the execution of the scheme.

11. Drainage.—In the last resolution it was observed that the extension of its underground drainage system into the suburbs was perhaps the most pressing task which now confronted the Corporation and it is satisfactory to find that substantial progress in drainage works has since been made. Several of the schemes undertaken will go far to remedy the insanitary conditions which prevail in the outlying parts of the municipality. The sewerage of certain roads west of Tolly's Nullah—a long-deferred advance—was undertaken and in all nearly 17,300 feet of sewers were constructed during the triennium. The completed sewers will drain portions of wards XXIII, XXIV and XXV.

The scheme for the drainage of the area west of the Kidderpore Docks and the Chetla rice mill area and the construction of the main outfall sewer in connection with the Improvement Trust Schemes VII and VIIA were commenced. Other important works taken in hand during the period were the construction of the main outfall sewer which forms a part of the scheme for sewerage of the area west of Hazra Road and the sewer to relieve the flooding in the Bhowanipore area. The Corporation besides completing certain works of minor importance continued the survey of the town sewers, and altogether 80 miles of sewers in the city and suburbs were examined. The structure of these sewers was found to be in a good state of preservation.

The decay of the Bidyadhari river which forms the drainage outfall of Calcutta is again compelling anxious attention. The spill areas which were opened out with the view of giving a better scour to the river have failed to fulfil expectations and regular observations go to show that the silting of the Bidyadhari continues. The problem of the ultimate disposal of the drainage of the city is now becoming urgent and it is recognised that in any case the pumping of storm water will be necessary within a very few years.

12. Roads and lighting.—Expenditure on road repairs and other road works has been heavy and indeed the improvement of road surfaces is one of the outstanding features in the record of municipal progress.

The value of asphaltum as a road surface has been established and some important thoroughfares in northern Calcutta have since been paved with this material. Bituminous surfaces, broad, clean footpaths, the paving of narrow lanes and gullies, the laying of stone setts in streets which carry heavy traffic, and greater attention to the repairs of ordinary macadamized roads—these things have to some extent effected a transformation of the conditions of a decade ago.

The efficiency of public lighting was well maintained and further progress was made with the scheme for the conversion of oil lights and the erection of additional gas lamps. Minor economies and improvements were also made in street lighting.

13. Markets.—The municipal markets (four in number) continue to be a valuable asset of the Corporation and a great public convenience. The total receipts they yielded were nearly Rs. 9 lakhs, and after meeting establishment and other charges including 5 per cent. interest on

the capital outlay, the Corporation made a net profit of Rs. 1½ lakhs during the year 1920-21. These institutions also enabled the Corporation to keep some kind of check on the prices of commodities as they soared up towards the end of the war and to restrict the extent of food adulteration.

Various additions and improvement were made in these markets, and a self-contained block for the sale of pure milk with a testing room for the examination of samples and a laboratory and hot water installation was constructed in the Sir Hogg Stuart market. A new building has been added to this market and the acquisition of land has been sanctioned for its further extension. The construction of a one-storeyed building and a chandney in the northern section of the College Street market was taken in hand towards the close of the triennium. The striking success of these institutions has led to proposals being brought forward for the establishment of other markets and a project to establish a municipal market, in place of the Mowlali Bazar, on the Lower Circular Road was approved and the acquisition of land sanctioned.

Minor improvements were also made in the private markets the conditions of which are still far from satisfactory.

14. Improvement works.—No comprehensive improvement scheme was undertaken within the triennium. But measures which go far to improve the amenities of the city such as construction of new roads, widening, kerbing and channelling of existing roads, and paving narrow passages with brick-on-edge were extensively undertaken. The park for purdanasheen ladies in the north of the town may be said to have justified itself, though full advantage has hardly yet been taken of the opportunities which it affords.

15. Sanitary improvement.—High prices and the scarcity of materials have made it impossible for the Health Department to enforce with any uniform rigour their requisitions for sanitary improvements in private premises.

Nevertheless the improvement of insanitary buildings in Malanga Lane and selected areas in Districts I and II has been steadily pressed on.

Many bustees were improved by the opening up of roads and the provision of sanitary conveniences, while some bustees were finally swept away.

16. Conservancy.—Extensive improvements were made in the permanent way and the rolling stock of the municipal refuse railway which had fallen into disrepair, and the chances of temporary break-down in the working of the railway have been reduced. The Minister is glad to observe that the Corporation has taken a definite step towards the introduction of motor traction for the removal of refuse in Calcutta. Five motor lorries have been purchased and have been placed in commission since the close of the triennium and a system of sunken bins has also been introduced for the temporary deposit of refuse. The service is not cheap, but if its gradual extension ultimately makes it possible to abolish the refuse railway, the citizens of Calcutta are not likely to grudge the cost.

17. Public Health.—In 1920-21, there was some improvement in public health, the previous year having been one of the worst on record, but as a whole, the triennium appears to have been an abnormal one from the health point of view. There was increased mortality under all heads, but it is thought that the disastrous pandemic of influenza in 1918 helped to sap the vitality of the people and thus opened the way to other diseases.

The death rate rose from 24·7 in 1918 to 39·3 in 1920-21 per thousand of population, while the birth rate fell from 20·9 to 17·1 in the last year under review. The decrease in births is due to a large extent to defective registration and to a certain extent to the general unhealthiness of the period under review. A special census of children in a particular ward went to show that nearly 13 per cent. of the children born in Calcutta has escaped registration. It is reported that this figure corresponds closely to the difference between the birth rate for the year and the quinquennial average. To remedy this defect the Chairman proposes to overhaul the system of registration and it is hoped the next return will show a better result.

The infantile death rate also rose to an abnormal figure and the expectation of a decreased mortality has not been realised. It rose from 239 per thousand births in 1917 to 357 and 386 in the last two years of the triennium. Defective registration has helped to inflate the returns. But there is no doubt that the general unhealthiness of the period has had also its effect. As usual the Jorabagan ward showed the worst record, and in 1918 over 50 per cent. of the infants in this ward perished—an appalling result. About 35 per cent. of an infantile deaths occur in the first week of life.

The Corporation Lady Health Visitors and Midwives continued to do excellent prenatal and child welfare work. Amongst the children delivered and attended to by them, there was a mortality of 43 per 1,000 in the first ten days of life and 24.9 among the older infants. This compares very favourably with the corresponding general infantile mortality of 117 per and 283.9 per 1,000. Provision was also made in this connection for the distribution of warm clothing and dried milk in deserving cases. The result achieved shows that there is considerable scope for the development of maternity and child welfare work and the Minister is glad to observe that the Corporation has approved a scheme for its extension. The scheme provides for four child welfare centres and in addition two maternity homes. A project for a home in the northern quarters at an estimated cost of Rs. 4,14,587 has since been sanctioned and a suitable site has been acquired.

The inequality of the death rate amongst males and females which appears to be a fixed feature of the vital statistics of Calcutta continued and the rate of 14.8 (males) and 32.1 (females) per mille for 1917 rose to 33.8 and 50.9 in the last year of the period under review.

The marginal figures show the mortality from influenza, plague, small-pox and tuberculosis.

Year.	Plague.	Influenza.	Small-pox.	Tuberculosis.
1918	210	4,115	545	1,826
1919	334	3,863	1,870	1,849
1920	63	1,665	2,925	2,120

The increased mortality from tuberculosis may to some extent be an aftermath of the ravages of influenza. Plague and cholera appeared in an epidemic form and the usual quinquennial epidemic of small-pox broke out in November 1919 after some premonitory outbreaks and lasted till June 1920. The mortality from cholera rose from 866 in 1917 to 3,688 in 1919. Although the infection was in a great measure spread by the pilgrims returning from Saugor Mela, yet the more severe prevalence of the disease in the riverain wards clearly indicated that the use of unfiltered river water is a potent means of infection. The mortality from malaria also showed an upward trend and rose from 984 in 1917 to 1,289 in 1920.

It is satisfactory to find that there has been a steady decrease in the percentage of *ghee* found adulterated since the passing of the Calcutta Municipal (Amendment) Act of 1917 and that the quality of *ghee* found in wholesale and big retail shops has improved. *Ghee* with which sweetmeats are prepared continues, however, to be of an inferior quality. Mustard oil was found to be adulterated with oil educed from pakra seed, which contains prussic acid. The public were warned against this new evil and effective steps were taken for the supply of pure mustard oil to the public. Vigorous measures were taken to secure the inspection of shops and to intercept unwholesome foodstuffs and adulterants coming from outside.

18. Education.—The total amount of aid given by the Corporation to educational institutions of all kind increased from Rs. 85,528 in 1917-18 to Rs. 1,40,030 in 1920-21; this included indirect grants in the shape of exemption from rates amounting to Rs. 30,943.

The improvement of primary education in Calcutta has at last taken definite shape. The scheme will involve a capital expenditure of about Rs. 21,75,000 and a recurring expenditure of approximately Rs. 4,75,000 when in full operation.

The project provides for 15 model schools and a training college for teachers and for the gradual and systematic improvement first of the existing schools and then of the new schools that may be established in the future. Government have agreed to contribute a total sum of 17 lakhs towards the capital cost of the scheme besides undertaking to pay Rs. 10,000 a year for three years and to place at the disposal of the Corporation the annual grant that is now spent on primary schools (Rs. 30,000).

19. **Personnel.**—Mr. R. M. Chatterji, Vice-Chairman, died in January 1919. He had been Vice-Chairman since 1914; and had rendered conspicuous services to the Corporation in responsible posts for nearly thirty-two years.

Rai Charu Chandra Chatterji (Secretary) Bahadur was appointed Vice-Chairman, and in February 1921 became Deputy Chairman. The latter post had previously been held by Mr. S. K. Sawday, I.C.S., Mr. Gurner, I.C.S., and Mr. Sterk, I.C.S. Mr. Donald and Mr. Payne—apart from two short periods in which Mr. Gurner acted—held the office of Chairman at different times during the triennium. The Minister desires to record his appreciation of the excellent work of all these officers and in particular to recognize once more the invaluable services rendered to Calcutta by Mr. Payne on the latter's retirement from the Corporation. He would also pay a tribute to the Municipal Commissioners who as a body have worked loyally and well for the welfare of their great city.

DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the Wheat Crop of Bengal, 1921-22.

(NOTE.—On an average of the five years ending 1919-20, the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of the irrigated wheat acreage to the total wheat acreage in (a) British India and (b) in the territory now reported on, has, in the five years ending 1919-20, averaged (a) 42·3 and 16·0 per cent., respectively.)

Character of the Season.—At the time when the special forecast was issued, the harvesting of the crop had already advanced considerably. The prevailing dry weather has since been favourable for threshing.

Area Sown.—According to the estimates of the District Officers, the total area under wheat amounts to 124,100 acres this year, against 116,900 acres last year.

Outturn.—From the District Officers' estimates, the provincial outturn works out at 68 per cent. of the normal this year, against 86 per cent. last year.

Taking the normal yield to be $8\frac{1}{2}$ maunds per acre, the gross yield of the crop for the province is estimated at about 26,300 tons, against 31,400 tons last year.

At the end of April, the average wholesale price of wheat at the principal marts of the province was Rs. 6-12-10 per maund or about 0·7 per cent. and 2·2 per cent. lower than the prices ruling at the corresponding periods of last year and in the year preceding respectively. The average wholesale price of common rice at the principal marts, on the other hand, was Rs. 6-2-7 or about 7·5 per cent. and 4 per cent. lower than the prices at the corresponding periods of last year and the year preceding respectively.

I have recently addressed you by telegram suggesting for the consideration of Your Excellency's Government the desirability of taking early steps to remove the misapprehensions which I have reason to believe are widely entertained as to the meaning to be attached to the passage quoted in the margin* from paragraph 3 of the Resolution issued by your Government, with my approval, on the 8th November last, on the subject of the terms and conditions on which officers of certain Indian services who desired to be released from further service in consequence of the introduction of constitutional reforms may be permitted to retire prematurely on proportionate pension. It has been represented to me that this passage in the Resolution has been commonly interpreted as

(i) Intention of a passage in the Resolution, dated 8th November, regarding premature retirement; (ii) future security of pensions.

* "All applications must reach the Local Government before the 31st March 1924, by which date officers will have had ample opportunity to appreciate the effects of the recent constitutional changes, and to arrive at a considered decision. Officers of the services specified who do not apply before that date will not be eligible for a pension on premature retirement in consequence of any constitutional developments which may subsequently take place."

intended definitely to preclude any officer whose employment may hereafter be terminated prematurely either by the Secretary of State in Council under the constitution provided by the present Government of India Act, or by an Indian Dominion Government, should such be constituted by an instrument amending or repealing that Act, from claiming pensionary recognition of the services which he has rendered and compensation for their unexpected termination. And, apart from the fear that such consequences are intended in the matter of compulsory retirement, I understand that the passage is further regarded as closing the door on any hope of the renewal of an offer similar to that held out by the Resolution, even on the occurrence of further legislation to amend the Government of India Act, which may have the effect of marking a further stage towards the grant to India of Dominion status. And the combined effect of these impressions has been, apparently, to give colour to the idea that a leading motive which prompted the Secretary of State in Council and Your Excellency's Government in framing the terms and conditions embodied in the orders of 8th November was a desire to induce as many as possible of the members of the all-India services, for whose maintenance, welfare and efficiency those authorities are directly responsible, to abandon their employment at the earliest possible date.

2. Your Excellency's Government will, I am confident, share my deep regret that language should have been used which is capable of an interpretation so fundamentally at variance with our objects and intentions; and I trust that it is now clearly understood by the members of the services that—

- (i) nothing in your Resolution has reference, directly or indirectly, to the compulsory retirement of officers whose employment it may hereafter be decided by whatever authority to terminate for whatever reason, before they have completed such service as, under ordinary regulations and expectations, carries the claim to a pension;
- (ii) that when the time comes for His Majesty's Government to recommend to Parliament further legislation with the object of granting to India a larger measure of self-government, it will be the unquestionable duty of the Secretary of State in Council to consider fully the extent to which such changes affect the conditions of service of those who will be bound by them, and whether they are such as to necessitate a re-opening of opportunities for voluntary retirement on pension; that it will further be his duty to take steps to secure the enactment of such provisions to that end as may seem just and necessary; and that nothing in your Resolution was designed to absolve the Secretary of State in Council from this obligation; and
- (iii) that in fact the intention of the passage in question was simply to emphasise the circumstance that the right to apply for a proportionate pension was an exceptional right conferred on the express recommendation of a Joint Select Committee of both Houses, with the implied authority of Parliament, in order to meet the conditions which have been brought about by the Act of 1919, or which may arise in the course of constitutional development under that Act; and consequently that the right was one which, once offered and exhausted, it would not be proper for the Secretary of State in Council to renew, save as the result of a similar mandate given on account of constitutional changes arising out of further Parliamentary legislation.

3. I desire, however, to take this opportunity of endeavouring to dispel other analogous anxieties which have been brought to my notice as being felt by members and ex-members, not only of the Indian services, but also of the Home Establishment of the Secretary of State in Council, as to the security of their pensions (whether in course of payment or in prospect) in the event of India's acquiring full Dominion status, or such an approximation to that status as has the effect of transferring from the Secretary of State in Council to the Legislative Assembly some portion or the whole of that measure of control over the appropriation of the revenues of India and over the services which is by the present Act and statutory rules vested in the Secretary of State in Council.

4. It would, of course, be idle for me to pretend that any declaration by myself, by the Council of India, or by His Majesty's Government as at present constituted, would have the effect of binding any future Government or Parliament as to the measures which they should respectively propose and ratify to safeguard the existing and accruing rights of persons in the Civil Service of the Crown in India whose conditions of employment may be affected by whatever further legislation Parliament may, in its wisdom, decide hereafter to enact in pursuance of the policy inaugurated by the Act of 1919. But it is evidently not generally appreciated that no change in diminution of the powers of control now exercised by the Secretary of State in Council in this regard, nor in modification of the law which now makes such pensions a statutory charge upon the revenues of India, could be effected without the fullest public discussion and by means of express Parliamentary enactment. It cannot be anticipated that His Majesty's Government and Parliament will treat lightly their obligation to ensure as an essential part of such an enactment that all pensions current at the time shall continue to be paid, that those officers whose services may have to be compulsorily terminated shall be adequately compensated, and that those who are entitled to pensions shall receive them. But in any event, I desire to place on record, with the full concurrence of my Council, my conviction that no future Secretary of State in Council of India will be found wanting in his duty of securing the fulfilment of those obligations, or will be found willing to surrender in the smallest degree the control which he exercises under the existing law, save on conditions which will adequately ensure that rights and expectations which it is now his duty to protect are fully guaranteed.

RESOLUTION.

LASCAR SEAMEN.

Simla, the 25th May 1922.

No. 2663.—The General Conference of the International Labour Organisation of the League of Nations in its session at Genoa in June 1920 framed a draft Convention for establishing facilities for finding employment for seamen. This Convention prescribed the formation of Employment Bureaux and the prohibition of private employment agencies. When the draft Convention came before the Indian Legislature in September 1921, both Houses recommended that it should not be ratified but that an immediate examination should be undertaken of the methods of recruitment of seamen at the different ports in India in order that it might be definitely ascertained whether abuses existed and whether these abuses could be remedied.

2. The Government of India accordingly determined to hold a preliminary enquiry into the conditions under which seamen are recruited at Bombay and Calcutta, the only ports in India where seamen are recruited in large numbers. The enquiry was conducted by Mr. A. G. Clow, I.C.S., Controller of the Labour Bureau in the Government of India, accompanied at each port by one representative of the shipowners and one representative of the seamen, selected by the Local Government. In accordance with Resolution No. 1208 of the 2nd March 1922, the Government of India then appointed a Committee, including two members of the Legislature in addition to the five gentlemen who took part in the preliminary enquiry, to examine the evidence so collected and to report what reforms were possible in the existing methods of recruitment. The Committee was constituted as follows :—

Mr. A. G. Clow, I.C.S., Chairman,
Sir Frank Carter, K.T., C.I.E., C.B.E., M.L.A.,
Mr. N. M. Joshi, M.L.A.,
Mr. C. S. Penny,
Mr. M. Daud, M.A., B.L.,
Mr. F. L. Barnett, and
Mr. Mohammad Ibrahim.

3. The Committee have presented a unanimous report in which they find that the present system under which shipping companies engage seamen through licensed brokers appointed under section 18 of Act I of 1859 or private brokers (in Calcutta sometimes known as *ghat serangs*) has resulted in grave abuses. After taking legal opinion, the Government of India have decided to treat as confidential the first three paragraphs of the Report which describe the existing system and the abuses to which it is liable.

4. The Committee explain that the shipping companies generally engage seamen through the brokers and pay them a commission calculated on the advances which the brokers make to the seamen on behalf of the companies. The first step in the selection of the crew is the nomination of the serangs or ghat serangs. The crew is selected later and the serangs and the butlers have naturally a considerable share in its selection. When the crew has been finally approved by the officer concerned, it is signed on the articles in the presence of the shipping master or one of his assistants. At this stage it is the duty of the brokers to give the men an advance of their pay. Immediately before the ship sails, an official medical examination is held and either as a result of this examination or from other causes, vacancies in a crew may arise at the last moment. The shipping companies depend upon the broker for the supply of men to fill these vacancies. The main functions which the brokers and ghat serangs are intended to fulfil thus include the supply of crews on demand, the payment of advances to the seamen who are engaged, and the replacement of deserters or of men rejected on medical grounds.

5. The Committee are unanimously of the opinion that this system has led to grave abuses which no mere amendment of detail would satisfactorily remove. They have come to the conclusion that it is imperative to introduce an entirely new system which does not involve the employment of intermediaries. It is clear that if the brokers and ghat serangs are no longer to be employed, arrangement must be made to carry out the duties at present entrusted to them. The Committee point out that this can only be effected by the organisation of employment bureaux. Their recommendations are contained in the paragraphs below.

6. The proposals of the Committee will be examined at once in consultation with maritime Local Governments. The Government of India desire to express their thanks to the Committee for an able and thorough examination of a difficult and important problem.

Recommendations of the Seamen's Recruitment Committee.

4. The present Committee owes its inception to the consideration by the legislature of the Draft Convention for establishing facilities for finding employment for seamen adopted by the Genoa Labour Conference in June 1920. We therefore devoted special consideration to the proposals contained in that Convention. Two alternative systems are suggested in the Convention. In one the system of employment offices is organized and maintained by representative associations of shipowners and seamen in co-operation. In the other, the system is maintained by the State. These seem to us to be the only feasible alternatives. Of the two, we regard the first alternative as, in principle, the better one. Unnecessary interference by the State with the conditions of labour in any industry is undesirable, and a system which is maintained by mutual co-operation of the parties concerned is likely to work much more smoothly than one which depends on the power of the State. At the same time, we recognize that there may be difficulties in securing the necessary co-operation. There is an organization at Calcutta containing a large proportion of men of all grades, and at Bombay the union contains nearly all the saloon crews, but in neither port are all the seamen in unions at present. We are anxious that the reforms which we hope to see introduced should not be jeopardized by the failure of either party to co-operate, and we therefore suggest that, if it proves impracticable to obtain the co-operation necessary to put the first alternative in operation, the second alternative—that of a state organization—should be adopted. At the same time, the first alternative should be set down as the ideal to be aimed at, and we trust that with the growth of healthy organizations amongst seamen and of mutual trust and good will, it will not be long before it can be brought into being.

5. The employment Bureau which we propose to set up in each centre will have at its head a single officer. We consider that he should be an officer having practical maritime experience, as recommended by the Genoa Conference, and it is desirable, also, that if possible he should have had experience of shipowners' and seamen's organizations. The success of the scheme will depend largely on his personality, and his selection will therefore be a matter of the highest importance. We consider that a considerable proportion of the present trouble in Calcutta can be traced to the fact that the supervision of recruiting has been entrusted to shipping officers who are constantly being changed and who, prior to taking up their posts, have not been working in the mercantile marine. The officer selected as head of the Bureau must have had this experience and he must be able to work sympathetically with shipowners, ships' officers and men and with the organizations of the shipowners and the men. Similar care should be exercised in the choice of his assistants.

6. One of the main functions of the Bureau will be the maintenance of a general register of seamen of each grade including recruits. Separate registers should be maintained for each line that so desires, and an additional register should contain the names of seamen who are not on the books of any of the lines having separate registers. It should be within the power of the Bureau to remove the name of any man from the register (*e. g.*, in the event of serious misconduct being proved) or to suspend any man entered on the register. Such a man would then be debarred from obtaining employment in any ship. At

the same time, in accordance with the principle enunciated in the Genoa Convention that "freedom of choice of ship shall be assured to seamen and freedom of choice of crew shall be assured to shipowners," it should be within the power of the shipowner (or his authorized representative) to demand the removal of any seamen's name from the register of the line concerned. Similarly any seaman should be entitled to have his name removed from the register of any line. In such cases, unless there are reasons for the contrary or unless the man's name is entered upon the register of another line by mutual arrangement, the name should be entered on the additional register. Separate registers must, of course, be maintained of types of crew that do not normally sail together.

7. We consider that the power of selecting all seamen, including serangs, should be restricted to two classes of employees of the owners or agents, viz., the Superintendents and the Masters of the ships. The Chief Officer, Chief Engineer and Chief Purser should have the power to select serangs or butlers, subject to the approval of the Master. And we propose, as regards serangs and butler, that they should be at liberty to nominate any serang or butler who has been discharged from a ship of the same line not less than three months before. Should the officer responsible for the selection not desire to choose such a serang his choice should be made from a fair proportion of men taken from the top of the roster maintained by the Bureau for that line, i.e., from those serangs or butlers belonging to the line who have been longest out of employment. We hope by these provisions to ensure two ends—to encourage lines to give men, as far as possible, continuity of employment, and to ensure that each man on the list shall have his claims regularly considered. Where neither the shipowners, their agents, the Superintendent, nor the Master are present at the employment office (e.g., in the case of a ship at another port belonging to a firm having no agent in the port of engagement) or where they waive their right to select, the choice would devolve on the Bureau.

8. In both Bombay and Calcutta, it should be possible to select the sukhanis on the system proposed above for the serangs. The work of the sukhanis renders them independent of the serang, and he need not be given a voice in their selection.

9. The serang is, in large measure, held responsible for the work of his crew, and it is necessary therefore to ensure that he should have some say in their choice. The Calcutta crews, with the exception of the Maldivis, are not split up into self-contained groups, and there is no close attachment between the serang and his crew. It is desirable that the power of the serang to select his crew should be limited as far as possible, without compelling him to sail in command of men who will make trouble on board or discredit him. We propose to secure this by taking the crew (including the hands between the serangs and the ordinary seamen) by roster, and by allowing the serang to make reasonable objections to any particular men so taken. It may prove advisable to allow the serang to nominate one or two men more directly. The nomination or rejection would, of course, in all cases, be subject to the approval of the selecting officer. It should also be possible for men to be taken who have been discharged from ships of the same line not more than one month before. The saloon crew should be similarly chosen.

10. The Bombay problem is more difficult. The crews, especially the deck crews, there are more closely attached to particular serangs: they frequently come from the same of neighbouring villages and from almost a family on board. We think that while the system proposed for Calcutta might be applied with advantage to the Punjabi and Pathan firemen, who stand in need of more protection than the other Bombay seamen, it would be a mistake to interfere with the power of nomination the serang at present has in respect of other crews. The approval of the selecting officer will be necessary in all cases. The system by which the butler can choose a few of his crew and the rest are taken by roster should be adopted for the saloon crews in Bombay.

11. An important function at present discharged by the brokers and ghat serangs is the payment of advances. We considered the suggestion of dispensing with advances but came to the conclusion that this was not a possible solution.

The seamen demand and require the advances. It is clear that Government cannot act as an insurance agent and undertake the monetary risks involved in desertion. But it should not be difficult to arrange for private agencies to undertake the risk. A maximum rate of commission might be prescribed, and licences could be granted to approved agencies to make advances at a commission not higher than the rate prescribed. The commission would be payable by the shipowners as at present. The full advance would be recoverable from the shipowners for all men who sail. Suitable agencies for the purpose would be the Seamen's Unions, co-operative societies, and respectable private individuals. The licenses would be granted by the Employment Bureau, and the advances would be paid, as at present, in the presence of the officer of the Bureau. The Bureau should afford assistance to advancing agencies to prevent the loss of advances.

12. Under the existing system, the brokers are responsible for getting the crew on board. If any of the crew desert it is their duty to fill vacancies. This duty will have to be undertaken by the Employment Bureau, and it will be the most difficult part of its work. We suggest that a system similar to that followed in England be adopted here, and that a certain number of spare men be sent down on the day of sailing, to fill vacancies arising suddenly from desertion or as a result of the medical examination. These men would be chosen by the head of the Bureau from the roster for that line or from the additional register, and they might receive a day's pay from the shipowners for being present, unless of course they were signed on. The men rejected at the final medical examination might also receive a day's pay. The number sent would depend entirely on the instructions of the shipowners. Cases of desertion should be carefully gone into, and "failed to join" should be entered on the continuous discharge certificate. The officer-in-charge of the Bureau should have power to suspend a deserter for a long period. Habitual offenders might be punished with removal from the registers.

13. We have given careful consideration to the question of setting up the Advisory Committees of representatives of shipowners and seamen contemplated by the Genoa Convention. We are agreed that such Committees, if they worked smoothly, would be able to perform useful functions in advising the head of the Bureau. But we are not agreed as to the advisability of introducing these Committees at an early stage. Four members of the Committee, Mr. Clow, Mr. Joshi, Mr. Daud, and Mr. Mahomed Ibrahim consider that the Committees should be set up as soon as practicable.* They would prove most useful in assisting the head of the Bureau to complete the scheme for recruitment. In our report we have dealt only with the board outlines of the scheme the details to be filled in later will be numerous and it is essential that at this stage, the head of the Bureau should be kept in close touch with both shipowners and seamen. The remaining three members, Sir Frank Carter, Mr. Penney and Mr. Barnett consider that there is a distinct danger that an Advisory Committee will result in serious friction and will hamper the head of the Bureau to such an extent that the establishment of the new system will be jeopardised. They think that the head of the Bureau should be given a free hand to set the system in operation, and Advisory Committees can be introduced at any stage when their necessity is obvious.

14. We consider that bribery, whether direct or indirect, to obtain employment for seamen should be regarded as a serious offence, and punishable with a considerable term of imprisonment. At present the maximum penalty is a comparatively small fine coupled with the loss of office in the case of certain persons. This most inadequate penalty, coupled with the difficulty of obtaining a conviction in cases of this type, has acted as a complete check on prosecutions. We suggest a maximum of two years' rigorous imprisonment. A heavy penalty, *e.g.*, a fine of Rs. 1,000 should also be possible for unauthorised persons who endeavour to supply seamen to any agency other than the Employment Bureau. On the other hand, there should be complete liberty to shipowners, seamen, their representatives or their organizations to supply seamen to the Bureau. In the case of the

offences referred to above, the head of the Bureau should have power to institute prosecutions on complaints or otherwise, and the cases should be treated as public prosecutions.

15. No separate figures are available to show how far the fees now levied under sections 5 and 6 of Act I of 1859 meet the expenses incurred in recruitment. But we consider that these fees should be diverted towards maintenance of the Employment Bureau, which will exercise the functions at present discharged by the Shipping Office.

16. Inquiries have not been made in ports other than Bombay and Calcutta, and we have, in consequence, no evidence regarding conditions at the other ports of India. We have, therefore, confined our discussions to Calcutta and Bombay.

Classes are held twice a week from 6 to 7 P.M.

(c) **Shorthand (Theory).**—Pitman's Shorthand is the system taught. Students having a sufficient knowledge of English are admitted at the beginning of the session in July. Students are also admitted in December, provided they have already a sufficient knowledge of Shorthand to enable them to appreciate the lectures in the session, December to April.

The minimum speed required to pass the examination is 80 words per minute. The class is held daily from 5 P.M.

The fee for the session, July to November, is Rs. 12, which may be paid in four monthly instalments of Rs. 3 each. The fee for the session, December to April, is Rs. 16, which may be paid in four monthly instalments of Rs. 4 each.

Combination of the above subjects and reduction of fee.—If a student simultaneously takes up two or three of the subjects (a) to (e), a reduction of Re. 1 per instalment of each of the fees payable by him will be granted : for example, if a student is a member of both the Shorthand and the Elementary Book-keeping classes, he will have to pay instalments of Rs. 2 for each subject, instead of Rs. 3 for the session, July to December.

(f), (g), (h), (i) and (j).—Classes are formed in these subjects if a sufficient number of candidates apply for admission. The fee for each subject is Rs. 3 for each series of ten lectures.

Students of this class have to attend Book-keeping and Mercantile Law classes, for which no extra fee has to be paid. The fee is Rs. 144, payable in advance in four half-yearly instalments of Rs. 36 each in the case of ordinary students and Rs. 72 in two half-yearly instalments of Rs. 36 each in the case of those who are practising as Auditors and hold a provisional license granted by Government.

2. **Examinations.**—The examination in subjects (a) to (j) is held at the end of April, at the end of the year's course, under the control of the Government Commercial Institute Board, and successful candidates receive certificates signed by the Director of Public Instruction, Bengal, and countersigned by the Secretary to the Bengal Chamber of Commerce. The examination fee for each subject is Rs. 5.

3. **Attendance.**—Strict regularity and punctuality of attendance are observed. Students must attend 75 per cent. of the lectures in order to appear at the examination. Classes are not held in the evening on Saturday.

4. **Standard of Admission.**—Candidates who have attended the lectures of the day course are eligible for admission. Others will be admitted, provided they appear qualified for the class or classes they seek to join.

5. **Prizes.**—Prizes of Rs. 50 each are offered by the Bengal Chamber of Commerce to the best candidates from the evening classes in subjects (b), (d), (f), (g), (h), (i) and (j). Three medals are offered by the Remington Typewriter Co. to the best three students of either the day or evening classes in the Typewriting examination.

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the twelve months, April, 1921, to March, 1922, as compared with the corresponding period of 1920-21 and 1919-20. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the twelve months, April, 1921, to March, 1922, amounted to 16,370,000 maunds, as against 14,154,000 maunds in the corresponding period of the preceding year,—an increase of 2,216,000 maunds or 16 per cent, being chiefly due to larger imports of rice from Burma. There was a decrease of 28 per cent in the imports of coal and coke (98,295,000 maunds as against 136,866,000 maunds a year ago). The value of the imports by rail, river, road, and sea (coastwise) of Indian cotton piecegoods showed a decrease of 5 per cent, the total value amounting to Rs. 11.17 lakhs as against Rs. 11.71 lakhs in 1920-21. The quantity of indigo imported during the twelve months, April, 1921, to March, 1922, decreased from 11,768 maunds last year to 8,849 maunds. The imports of raw jute amounted to 4,130,000 bales as against 5,252,000 bales.—a decrease of 1,122,000 bales or 21 per cent. The importations of gunny bags also showed a decrease of 101 million bags (287 million bags against 388 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) increased by 702,000 maunds, or 12 per cent, from 5,914,000 maunds to 6,616,000 maunds, but those of sugar declined by 278,000 maunds, or 33 per cent, from 818,000 maunds to 570,000 maunds. The imports of tea increased 51,000 maunds or 2 per cent to 2,342,000 maunds.

Exports.—The value of the exports of cotton piecegoods, foreign, from Calcutta* by all routes during the twelve months, April, 1921, to March, 1922, fell by 24 per cent from Rs. 24.39 lakhs to Rs. 18.51 lakhs. The exports of gunny bags (including the exports by sea to foreign countries) decreased from 1,323 million to 1,068 million bags, but the shipments of gunny bags to other Indian ports increased from 61 to 79 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) showed, an increase of 210,000 maunds or 4 per cent from 5,370,000 maunds to 5,580,000 maunds.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.

† One maund of paddy is equivalent to 25 seers of rice.

GOVERNMENT OF INDIA.

DEPARTMENT OF INDUSTRIES.

Simla, the 1st May 1922.

RESOLUTION.

The Government of India have had under consideration for some time the question of the preparation of index-numbers designed to measure the cost of living for industrial workers in India. The publication of such index-numbers in other countries was originally undertaken by statisticians who had mainly an academic interest in the subject. The great fluctuations in prices which began in 1914 and have continued since led to the use of index-numbers as a basis for the fixation of wages. For example, in Great Britain at the present time, the wages of over three millions of workers depend directly on an index-number issued monthly by the British Ministry of Labour. This use of the index-number is not free from danger, but there is little doubt that, where employers and workers can be induced to accept an index-number as a basis for a sliding scale of wages, the result is a great decrease in industrial unrest. Wages are thus regulated automatically by movements in prices, and although the correspondence can never be exact, the adjustment provided proves sufficiently accurate to remove one of the chief causes of strife.

2. In many of the strikes which have occurred in India during the last three years, and more especially in those which marked the second half of 1920, the question of the correlation of wages and prices was prominent. Workers asserted that the purchasing power of their wages had fallen, and claimed that large increases were necessary to bring their wages up to pre-war standards. Employers were ready as a rule to concede the principle that the workers should not be placed in an unfavourable position in comparison with previous years, but they disputed the assertions made by the workers, and considered that the increases they offered, or had already given, were adequate. Some employers made endeavours at their own expense to calculate the rise in the cost of living for their workers, and Government in some instances based the increases they gave to their own employees on similar investigations. But these inquiries were based on somewhat scanty material. Naturally also the results of such *ad hoc* investigations did not inspire the same confidence as an index-number, constructed regularly from month to month and year to year, and without reference to particular disputes, usually receives. These considerations led the Government of India to an examination of the possibility of constructing periodic index-numbers designed to measure movements in the cost of living of the industrial classes throughout India. They recognized that the index-numbers already published could not be adapted to this purpose.

3. The question was examined in detail at a conference held in Delhi in January 1921, at which the representatives of Government had the assistance of Mr F. H. McLeod, C.B., formerly Director of Labour Statistics, in the Board of Trade and Chairman of the British Industrial Court, Dr. Gilbert Slater, Professor of Economics in the University of Madras, and Mr. A. R. Burnett-Hurst, Professor of Economics in the Muir Central College, Allahabad. The chief difficulty in the preparation of a satisfactory scheme was the absence of any estimate of the comparative expenditure of the industrial workers on different items that could be regarded as even moderately correct. The basis for calculating such expenditure is usually furnished by the collection of

budgets showing the actual expenditure for typical families from week to week, or month to month. But no budgets on which reliance could be placed were then available. An alternative method of assessing the comparative expenditure is to estimate the exports, imports and production of different commodities for a particular area, and thus arrive at the average quantity consumed by each inhabitants of that area. It will be evident that if an index-number based on the latter method is to be even approximately accurate, the average consumption for the inhabitants of the area concerned must not differ essentially from the average consumption for the particular class of inhabitants, *i.e.*, industrial workers, to whom the index-number is designed to refer. Moreover, the only area for which it is possible to obtain statistics of exports, imports and production is India as a whole. So that an index-number for India or for any part of India constructed on these lines is open to criticism on two grounds, apart from any inherent errors in the statistics used. In the first place, it assumes that the differences between one province and another are not such as to vitiate the application of averages based on all-India figures to particular industrial centres. Secondly, it ignores differences between the mode of living of the industrial classes and that of the population of India as a whole.

4. The Government of India thus reached the conclusion that, while the method discussed above afforded the only means of constructing an index-number with the material already available, no reliance could be placed on index-numbers so constructed until they had been checked by the collection of family budgets. Local Governments were accordingly addressed in March 1921. The suggestion was then made that index-numbers should be constructed on the basis of estimates of national export, import and production, checked by an early collection of family budgets. The Government of India had the hope that it might ultimately be possible to construct an index-number which would measure, with some degree of accuracy, movements in the cost of living for the industrial classes in India. At the same time, they suggested that particular attention should be directed towards obtaining accurate statistics of retail prices. Errors in the calculation of the quantities of particular commodities entering into the construction of an index-number are of minor importance compared with errors in the prices applied to these commodities. The former, unless they are very large, do not produce serious errors in the final result; the latter, if they are considerable, destroy completely the value of any index-number based upon them.

5. The proposals made by the Government of India were accepted by the majority of Local Governments, and in several important centres investigations designed to secure accurate figures of the comparative consumption of industrial workers have been set on foot. These investigations have not yet been completed, but there is reason to hope that they will furnish material which, in addition to providing a basis for the construction of index-numbers, will throw valuable light on the conditions of life and labour in centres of industry. An index-number is now regularly published in Bombay, and the Government of India hope that other provinces will be in a position, when the necessary statistics have been collected, to publish figures that will secure acceptance. Local Governments will be free to follow their own policy in this matter. The Government of India trust that, in view of the importance of the subject, the public will accord all necessary encouragement and assistance to those who have undertaken the work.

6. At the same time, the Government of India have decided that the construction of an all-India index figure should not be undertaken at the present time. As has already been mentioned, wide differences exist between province and province, and without the collection, under conditions that will secure accuracy, of a large mass of statistical matter culled from typical family budgets from every part of India, it will not be safe to assume that the averages possess the merit of reliability. Moreover, there is no doubt that an index-number constructed on the basis of a restricted area such as a province or an industrial district, where the mode of living of the community is fairly standardised, will inspire much greater confidence among employers, workers and the general public. Thus, while the preparation of an all-India figure would not be without interest, or altogether without utility to those dealing with industrial problems, the Government of India think that it will be wiser to postpone its construction at present. Accurate budgets and retail price statistics are not yet available for all parts of India. Provincial and local

index-numbers have yet to establish themselves in public confidence. When the existing difficulties have disappeared and the leading Local Governments are in a position to publish index figures of recognised accuracy, it may be possible to build up on those an all-India figure that will command general support.

ORDERED that a copy of the Resolution be forwarded to all Local Governments and to the Administrations noted in the margin* and to the Finance, Commerce and Revenue and Agriculture Departments of the Government of India.

APPOINTMENT OF A COMMITTEE TO MAKE RECOMMENDATIONS FOR EFFECTING ALL POSSIBLE REDUCTIONS IN THE EXPENDITURE OF THE LOCAL GOVERNMENT.

GOVERNMENT OF BENGAL.

FINANCE DEPARTMENT.

Finance.

DARJEELING, THE 13TH JUNE 1922.

RESOLUTION -No. 9113 F.

THE question of the possibility of retrenchment in public expenditure has engaged the close attention of the Bengal Government, and of the Bengal Legislative Council, during the eighteen months that have elapsed since the inauguration of the reformed constitution. The resources placed at the

disposal of the local Government under the financial settlement made in connection with the reforms were insufficient to cover the cost of carrying on the administration on the lines previously accepted as necessary, and the financial stringency thereby caused necessitated the closest scrutiny of all expenditure both by Government and by the Council. At the first meeting of the Council in February 1921 a resolution was moved by Mr. Surendra Nath Mallik, recommending the appointment of a committee of twenty members of the Council to report what retrenchments in the expenditure of the various departments of Government could safely and usefully be made. This resolution was withdrawn after a discussion during which it was suggested that it was premature to start a general retrenchment enquiry before the Council had had an opportunity of considering the budget, and while the question of a revision of the financial settlement was still under the consideration of the Government of India and of the Secretary of State. It was, however, stated that the local Government recognized the right of the Council to demand the fullest information regarding the details of public expenditure, and an undertaking was given that if the Council, after the conclusion of the budget debate, expressed a desire for further examination of the financial provision made for any department, Government would endeavour to meet its wishes.

2. That policy has been steadily pursued during the past year. In July 1921 Government accepted a resolution for the appointment of a committee of the Council to enquire into the Police administration with a view to effecting a reduction of expenditure without impairing efficiency, and in August another committee was appointed at the request of the Council to consider the possibility of abolishing the posts of Divisional Commissioners. Neither of these committees has yet succeeded in arriving at any conclusion on the problems set before it. In September, the decision of the Government of India to limit the revision of the financial settlement to a remission for three years of the provincial contribution of 63 lakhs compelled a further anxious reconsideration of the financial position in connection with the framing of the budget for the current year. Every department of Government underwent rigid scrutiny, and provision for all schemes which were not of imperative urgency was excluded from the estimates. In this manner a saving of over Rs. 70 lakhs was effected, but Government and the Council were still faced with a deficit of over a crore of rupees between income and expenditure, which it was necessary to cover by the imposition of new taxation. The Council after prolonged discussion accepted the necessity, but the possibility of effecting further retrenchments was a subject which naturally loomed large in the last budget debates. In December another resolution for the appointment of a general retrenchment committee was withdrawn on an undertaking being given that the departmental budgets would be placed before the Standing Committees for scrutiny. This undertaking was duly observed, but the Standing Committees, far from suggesting retrenchments, in most cases recommended an increase in the departmental budget provisions. In the course of the general budget discussions, dissatisfaction was expressed with the result of the enquiries of the Standing Committees, and several members urged the necessity for a retrenchment enquiry of a wider nature than has hitherto been undertaken.

3. The Governor in Council, with the concurrence of the Ministers, has decided that the time has come when the request should be acceded to. An authoritative decision as to the possibility of retrenchment is necessary in the interests of Government no less than for the satisfaction of the public. The resources of the local Government, even when augmented by the taxation to which the Council has recently agreed, will leave only a small surplus after providing for the needs of the administration on the standards hitherto accepted, and it is evident that unless considerable retrenchments can be effected in the present scale of expenditure, it will be impossible, without further taxation, to finance any considerable new schemes of development. It is, therefore, most desirable that Government, the Legislative Council and the public should be in possession of a reasoned statement of the essential financial requirements of the administration.

4. His Excellency in Council has accordingly decided to appoint a committee to consider what retrenchments, if any, are possible in the existing scale of expenditure of the Government of Bengal. That scale has been reached by a gradual development over a long period of years, and covers a number of activities of varying degrees of relative necessity. It has always been considered, and it will be generally agreed, that it is the elementary duty of a provincial Government to provide the establishments required for the magistracy, the law courts, the police, the jails, the collection of the revenue, and so forth, though opinions may differ as to the amount which it is necessary to spend on these essential functions of the administration, or as to the nature of the staff which should be employed on them. But a modern Government cannot confine its functions to the maintenance of law and order. It must also undertake the duty of providing for the improvement of public health, the advancement of education, the introduction of improved agricultural methods, and other similar matters affecting the daily life and prosperity of the vast mass of the population. The ability of Government to further such objects must, however, be limited by the resources which are available, or which can be made available without imposing an undue burden of taxation upon the country.

5. The accompanying memorandum and statements classify in some detail under various heads the expenditure of the Government of Bengal provided in the budget for 1922-23 which was voted by the Council last March. As already stated, the budget was rigorously curtailed and contains no new schemes. It may therefore be taken to represent what the various departments consider to be their minimum requirements for carrying on their work on existing lines, and will thus form a good basis for the committee's enquiries. Further statements are being prepared for presentation to the committee showing the strength of the various services and the manner in which their members are employed, and the committee will also be supplied with memoranda comparing the strength and rates of pay of the services in 1912 with those of the present day, and explaining the growth of the local Government's expenditure during the last five years. It is hoped that these statements will suffice to enable the committee to decide on the lines of their investigation, and all departments have been instructed to supply them with any further information or explanations that they may require.

6. The Governor in Council desires the committee to make recommendations for effecting all possible reductions in the expenditure of the local Government. He wishes to leave the committee a free hand in their enquiries, but there are certain points on which he would welcome specific recommendations. These are—

- (1) Assuming that the budget for 1922-23 provides for functions which it is necessary, or desirable, that the local Government should undertake, could they be carried out at a smaller cost?
- (2) Having regard to the present financial position and outlook, is it desirable that any of these functions should be omitted or curtailed?
- (3) If, in order to meet popular demands for larger expenditure on education, sanitation, agriculture, and other similar purposes, it is decided to undertake a greater expansion of the activities of Government than has hitherto been possible, would it be desirable to relieve provincial revenues by devolving financial powers and responsibilities on local bodies?

It may be that the committee's enquiries will lead them to recommend changes of policy. The decision as to the action to be taken on such recommendations must rest with the local Government, but the Governor in Council does not wish to limit in any way the scope of the committee's investigation, and it will be open to them to indicate the economies which might be effected if particular policies were adopted, modified, or abandoned.

7. As regards the constitution of the committee, the Governor in Council is convinced from an examination of the results of previous retrenchment enquiries that it must be a small and businesslike body if it is to

produce any useful results within a reasonable period. His Excellency in Council has also decided that the committee should be predominantly non-official in character. Official views on the subject of retrenchment have been frequently expressed in the Council and elsewhere, and will doubtless receive due consideration at the hands of the committee, but what is now desired is an independent examination of the case by an impartial and competent authority. The committee will accordingly be constituted as follows :—

Sir Rajendra Nath Mukherji, K.C.I.E., K.C.V.O. ... *President.*

Mr. C. W. Rhodes, C.B.E., M.L.A.

Mr. Surendra Nath Mallik, M.L.C.

Rai Abinash Chandra Banarji Bahadur, M.L.C.

Members.

Mr. H. E. Spry, C.B.E., Financial Secretary to)
the Government of Bengal.

The Governor in Council believes that the composition of the committee will command general confidence, and he is grateful to the President and members for consenting to undertake this important public duty.

The committee will meet in Calcutta early in July, and the Governor in Council hopes that their report will, if possible, be submitted before the end of the year, so that it may be available for the preparation of the budget of 1923-24.

ORDER.—Ordered that a copy of the Resolution be forwarded to all members of the committee.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Governor in Council.

H. E. SPRY,

Secretary to the Government of Bengal (offg.).

MEMORANDUM.

1. The three statements attached purport to give an analysis of the expenditure of the local Government as shown in the Financial Statement for the current year, 1922-23. Statement I shows the provincial expenditure under the three main divisions of headquarters, mufassal, and expenditure in England. Statement II observes the same divisions, but gives the figures under each major head separately, and statement III shows the figures for minor heads.

2. Under headquarters' expenditure has been shown all expenditure that can legitimately be considered such, and it includes, in addition to the cost of the Secretariat, the cost of heads of departments and their establishments. Officers whose headquarters are at Calcutta, but whose duties lie mainly out of Calcutta, or who are not a part of the headquarters staff of Government, have been treated as mufassal officers. In each statement the figures have been shown under eight different heads. The establishment charges have been divided between Imperial, provincial, subordinate, and ministerial officers, and the charges on account of pension, allowances, and contingencies have similarly been shown separately. Under non-establishment charges is included all expenditure of a non-establishment character which does not properly fall under any of the other seven heads, and which is incurred in carrying out the policies of the administrative departments.

3. Perhaps the most noticeable feature of these figures is that, whereas the mufassal charges amount to 89·4 per cent. of the total provincial expenditure, the headquarters charges amount to only 8·5 per cent. The balance is accounted for by the expenditure in England. The total establishment charges excluding allowances amount to 4, 90, 33, and the percentages of the various services are as follows :—

Imperial Officers	17·9
Provincial „	19·2
Subordinate „	17·2
Ministerial Officers and menials	45·7

The establishment charges on account of the headquarters staff amount to a little more than 13·5 per cent. of the total establishment charges of the province.

4. The percentages of the total provincial expenditure are as follows :—
Establishment—

Imperial Officers	8·6	} 47·9
Provincial „	9·2	
Subordinate „	8·2	
Ministerial and menial	21·9	
Pensions	4·8

(5) The examinations will be advertized at least four months before the dates of the examinations, and applications, which must be on the prescribed form and supported by original certificates as to experience and character, and accompanied by fees, will be received up to a date, duly advertized, not less than one month prior to the examinations. No application which is not in the prescribed form, or which is not supported by the certificates and fees referred to above, or which is not submitted in due time, will be considered by the Board.

The examiners shall have power to eliminate the oral examination in the case of candidates who do not reach a standard in the written examination to be prescribed by the Board of Examiners.

(8) The following shall be the maximum number of marks given for each subject :—

DACCA, the qualify.

(10) A candidate for a first class certificate, who does not reach the necessary standard, may, nevertheless, at the discretion of the local examiners, be recommended to the Board of Examiners for a second class certificate, if, in their opinion, he has done sufficiently well to deserve it.

(11) The Secretary to the local examiners shall submit a report of the result of the examination giving the number of marks obtained by each candidate in each subject, to the President of the Board of Examiners within one month of the close of the examination.

(12) The questions to be set at the examinations shall be prepared by the Board of Examiners which may, at its discretion, confer with the local examiners.

(13) At least one examination for first class candidates and at least one examination for second class candidates shall be held annually in one of the Bengal or Bihar and Orissa coalfields; and in other parts of India examinations will be held whenever, in the opinion of the Board of Examiners, the number of candidates in a coal mining centre justifies the holding of an examination.

(14) No candidate will be allowed to take part in the examination until he has produced an authorization from the Board of Examiners.

(15) Every candidate must sign a register, in which he will be given a definite number. He must sign his name and write his registered number at the top of every page of the paper on which he writes the answers to the questions.

(16) The number of the question must be given in bold figures before the answer to each question.

(17) The calculations and work by which a result is obtained must be clearly shown in immediate connection with the answer to each question.

(18) Answers must be strictly confined to the questions asked.

(19) Sketches may be made to make answers clear.

(20) When sketches are asked for, it should be understood that, unless otherwise stated, freehand sketches, with dimensions, are all that is necessary, and candidates should not spend time in making finished drawings.

(21) Any candidate speaking to any other candidate during the examination, or using any book, notes or private paper, or acting in any manner which the examiners consider improper will be liable to be disqualified at their discretion. The Board of Examiners may in such a case use their discretion as to allowing the candidate to sit at any future examination.

(22) When a candidate has completed the answers to the questions, or when the time allowed for answering the questions has elapsed, or he has been disqualified, he must hand the paper of questions and his answers to the examiners, and at once leave the examination room.

(23) A time-table will be supplied to each candidate at the commencement of the first day's examination.

(24) The oral examination will be held at a subsequent date. Only those candidates who obtain a certain degree of proficiency in the written examination will be examined orally. Due notice of time and place will be sent to each candidate required by the examiners for oral examination.

(25) The number of marks given for each question will be shown in brackets at the end of the question.

(26) Ink and paper will be provided, and no paper other than the official paper provided may be used. Candidates must bring their own pens and pencils, drawing pens and drawing instruments, including a protractor.

These regulations cancel all previous regulations and shall take effect from the 1st January 1923.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR MAY 1922.

I. **Character of the season.**—During the month under review light rain fell after a long spell of drought. It was greatly in defect of the normal throughout the Presidency excepting in the district of Jalpaiguri, where the fall was only slightly in excess. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Harvesting of summer rice was completed. Sowings of jute and paddy were practically at a standstill, but the operations were greatly accelerated by the rains towards the latter part of the month. The progress of sowings, so far made in the low-land tracts, was generally unsatisfactory. Preparation of lands for winter paddy and their sowings continued slowly.

III. **State of standing crops.**—The condition of standing crops was not favourable, their growth being much affected by drought.

IV. **Prospects and probable outturn.**—Prospects of standing crops, so far, were not hopeful. The outturn of wheat was estimated at 68 per cent. and that of spring oilseeds at 73 per cent. of the normal this year.

V. **Damage to standing crops.**—Considerable damage was caused to young jute plants and other autumn crops by the unusually prolonged drought in many parts of the Province.

VI. **Condition of agricultural stock.**—The condition of livestock was generally fair. Cattle disease, however, prevailed more or less in parts of Nadia, Murshidabad, Bankura, Hooghly, Rajshahi, Jalpaiguri, Darjeeling, Malda, Mymensingh, Bakarganj, Tippera, Noakhali and the Tripura State.

VII. **Failure of pasturage and fodder.**—Scarcity of fodder and water was felt in many parts of the Presidency, but the situation is now improving.

VIII. **Prices of food-grains.**—During the second fortnight of the month, the prices of common rice of the cheapest quality rose in twelve districts, fell in eight and remained stationary in the rest of the Presidency. The price ranged from 5 seers per rupee in the Tripura State to 8 seers per rupee at Dinajpur, Jalpaiguri and Rangpur.

IX. **Condition of agricultural population.**—The condition of agricultural population was reported to be fair.

REPORT

ON

PUBLIC INSTRUCTION IN BENGAL

FOR

1920-21.

CHAPTER I.

Introductory.

The number of institutions under public and private management rose from 52,879 to 53,968 or by 1,089, but their pupils fell from 1,953,909 to 1,945,145, a loss of 8,764. Public institutions increased in number from 50,620 to 51,994, while private decreased from 2,259 to 1,974. The number of pupils in public institutions rose from 1,886,599 to 1,888,510 or by 1,911, and in private institutions decreased from 67,310 to 56,635 or by 10,675. This decrease can be ascribed to three distinct causes. Adverse economic conditions compelled many withdrawals; the non-co-operation movement reduced the number attending colleges and high schools; lastly, the number given above does not include, as in previous years, pupils of Technical and Industrial schools, which have ceased to be controlled by this Department from the year under review. Of the total number of pupils in all classes of institutions, 1,588,730 were males, and 356,415 females against 1,611,175 and 342,734 respectively in the preceding year.

Total number of institutions and pupils.

2. The number of public institutions included, on 31st March 1921, 51 arts and professional colleges, 908 high schools, 1,833 middle schools, 47,772 primary, and 1,430 special schools. The corresponding figures on the same date of the previous year were 53,903; 1,897; 46,240 and 1,527. Of the public institutions, 379 were managed by Government, 3,114 by district boards and municipalities, 41,081 were aided, and 7,420 unaided. In the previous year the corresponding figures were 393, 3,018, 39,989 and 7,214.

Different classes of public institutions.

3. The total expenditure on public instruction amounted to Rs. 3,09,22,377 as compared with Rs. 3,01,92,891 of the preceding year. Of this Rs. 2,13,98,466 represented direct, and Rs. 95,23,911 indirect expenditure, against Rs. 2,05,22,304 and Rs. 96,70,587 of the year before. Of the total expenditure Rs. 14,09,422 and Rs. 2,25,988 was provided from District and Municipal funds; Provincial revenues contributed Rs. 1,48,78,484, while Rs. 1,34,85,051 and Rs. 49,23,432 came from fees and other private sources, respectively. The corresponding figures for the previous year were Rs. 13,38,693; Rs. 2,06,030; Rs. 1,00,05,332; Rs. 1,31,58,444 and Rs. 54,84,392. Thus expenditure increased under all the heads except "Other sources."

Total expenditure on public instruction.

4. The year witnessed the administrative changes inaugurated by the Reforms, which transferred "Education" (excluding European education) to a responsible Minister. The Hon'ble Mr. P. C. Mitter, M.A., C.I.E., first Education Minister for Bengal, took over his duties in January 1921. Sir Henry Wheeler, K.C.S.I., K.C.I.E., at the same time assumed control of European education. The same reforms also made the Director of Public Instruction,

Noteworthy features of the period under review.

Bengal, *ex-officio* Deputy Secretary to Government in the Education Department. Mr. W. W. Hornell, M.A., C.I.E., became the first Deputy Secretary.

In respect of discipline the year has been critical. Signs of unrest due to the "non-violent non-co-operation" movement appeared among Bengal students about the close of 1920. As leaders advised students to sever connection with schools and colleges controlled by Government or by the University, a large proportion of college students were emotionally affected by this appeal, to which many responded. Schools were also affected. Most of the colleges were closed temporarily. Bands of students who had withdrawn from their work went about stimulating the boycott of colleges as well as of University or Government examinations. But guardians gave little support to the movement, and the excitement died out gradually. Most of the students returned, and colleges and schools resumed normal work, though an appreciable number of students appear to have abandoned school or college permanently; these withdrawals have seriously crippled the fee-income of private institutions, a few schools among which were helped by Government with additional grants to keep themselves alive pending the return of normal conditions. The agitation, though damaging in its financial effects and in other ways, has served a useful purpose by helping to create a public opinion in favour of practical and vocational education. There is now a wide and real demand for this in the country, springing largely from the knowledge that in present-day conditions the prospects of employment which await the average products of the literary type of education are somewhat drab, and from a belief that practically or vocationally trained men will more easily fit into the economic structure, and thus be more valuable members of society. The subject is now engaging the attention of Government and of the University. It may be pointed out in this connexion that the special classes, which now exist for giving boys a training less literary in its nature than the matriculation course side by side with general instruction, have not hitherto received much support from the people who are naturally conservative and dislike manual labour. The Education Department, while unable to accept some of the cruder forms of the popular demand, welcomes the prevalent desire that considerable practical bias be imparted to school education in Bengal, and that facilities for scientific and other non-literary training beyond the school stage be provided on a more generous scale.

CHAPTER II.

Controlling Agencies.

The Indian Educational Service.

5. During the year the Indian Educational Service was reorganised with retrospective effect from 1st December 1919. Two distinct cadres were formed with different rates of pay for men and women members of the service. Each cadre was divided into three branches, viz., the Administrative, the Collegiate and the Special.

Men's Branch.

The Men's cadre of the Indian Educational Service now includes, besides the ordinary grade, two selection grades—senior and junior—comprising 5 and 15 per cent. of the posts in the cadre, respectively. The rate of pay for the ordinary grade ranges from Rs. 400 to Rs. 1,250. The pay of the posts in the junior selection grade varies from Rs. 1,250 to Rs. 1,500 and of those in the senior from Rs. 1,550 to Rs. 1,750. The members of the Men's cadre are granted, in addition to their grade pay, an overseas pay varying from Rs. 150 to Rs. 250 subject to certain conditions. During the year 15 posts were added to the Men's Branch, which included previously 52 appointments in lieu of an equivalent number of posts in the Bengal Educational Service. The total strength of the men's cadre thus stood at 67 posts on 31st March 1921.

Women's Branch

The pay of the ordinary grade of the Women's cadre of the Indian Educational Service ranges from Rs. 400 to Rs. 850. This cadre includes one selection grade consisting of 20 per cent. of the total strength of the

cadre. The pay of the selection grade posts varies from Rs. 900 to Rs. 1,050. There is also an overseas pay of a uniform rate of Rs. 50 for members of non-Indian domicile. The number of women members of the Indian Educational Service stood at 3 on 31st March 1921 as in the year before.

6. During the year the Bengal Educational Service also was reorganised, two separate cadres on different rates of pay being constituted for men and women.

The Bengal Educational Service.

Men's Branch

A time-scale of pay has been introduced in place of the graded system which existed previously; the minimum and maximum pay has been fixed at Rs. 250 and Rs. 800. On the 31st March 1920 the Bengal Educational Service contained 188 posts—184 permanent and 4 temporary—for men (excluding 17 posts for women). Three permanent and one temporary posts were added to the cadre, while 15 posts were raised to the Indian Educational Service status. Thus on the 31st March 1921 the cadre of the men's branch of the Bengal Educational Service consisted 177 posts of which 5 were temporary.

The sanction of the Secretary of State was received to the formation of a scale of pay for the women's branch of the Bengal Educational Service subject to a minimum of Rs. 200, and a maximum of Rs. 500. On 31st March 1921 the number of women officers in the Bengal Educational Service stood at 17, as on the 31st March 1920.

Women's Branch.

7. On the 31st March 1920 the Subordinate Educational Service cadre consisted of 1,182 posts. Forty-one posts were added during the year. Of those, 13 were created temporarily in connection with the establishment of the Dacca Intermediate College, 18 for strengthening the subordinate inspecting staff in Eastern Bengal, and the remaining 10 for certain colleges and schools. Thus the strength of the service stood at 1,223 posts on 31st March 1921.

Subordinate Educational Service.

8. On the 31st March 1920 the number of appointments in the Lower Subordinate Educational Service was 451. Twenty-one posts were converted into appointments on higher rates of pay in the Subordinate Educational Service and outside the grades of the Subordinate Educational Service. The total strength was therefore 430 posts on 31st March 1921.

Lower Subordinate Educational Service.

9. Besides the 159 posts for Vernacular teachers in Government high schools mentioned in the last annual report, the Vernacular Teachers' Service includes 156 appointment attached to secondary schools for girls, middle English schools, and guru-training schools of the improved type. The total strength was thus 315 posts on 31st March 1921.

Vernacular Teachers' Service.

10. Government have sanctioned 44 appointments in the clerical service for secondary high schools (40 for boys' schools and 4 for girls' schools) in connection with the scheme of improvement for secondary education. Of the 4 appointments for girls' schools one has been held in abeyance, because one of the four men who are to occupy the posts draws higher pay outside the graded service. There were thus 43 posts on 31st March 1921.

Clerical Service.

11. On the 31st March 1920 there were 410 appointments outside the grades of the Subordinate Educational Service including 46 posts of the Vernacular Teachers' Service which were subsequently transferred to a regular cadre. During the year 11 posts outside the graded services were created, and two appointments abolished. Thus the number of appointments outside the grades was 373 on 31st March 1921. Of the officers outside the grades 35 drew salaries of Rs. 200 a month or upwards, and the pay of the rest varied from Rs. 12 to Rs. 180 a month.

Officers not within the classified list

12. The Committee appointed by Government to frame proposals for the reorganisation of the Educational services below the Bengal Educational Service submitted their report to Government in February 1921.

Subordinate Educational Service Reorganisation Committee

13. Mr. W. W. Hornell was in charge of the office of the Director of Public Instruction, Bengal, during the year except for the space of a month, when he went on leave. Mr. J. W. Gunn officiated for him. With the exception of this brief period, Mr. Gunn held the office of the Assistant Director of Public Instruction during the year under review until February, when Mr. E. F. Oaten was appointed to the post. Mr. J. A. Taylor, Assistant Director of Public Instruction for Muhammadan Education, Bengal, returned from leave during the year. The services of the Superintendent

of Industries and Inspector of Technical and Industrial Institutions, Bengal, were placed at the disposal of the Director of Industries during 1920-21.

CHAPTER III.

Collegiate Education.

Arts Colleges.

15. On the 31st March 1921 there were 33 arts colleges for men and 3 for women, with 19,788 students against 21,557 of the previous year. The decrease was due to economic stress and to the non-co-operation movement. These figures may convey a false impression, since the date to which these figures refer, March 31st shows the losses when non-co-operation was at its height. The commencement of the new session in July, which falls outside the scope of this report, saw these losses much reduced. The arts colleges cost Rs. 26,61,642 as compared with Rs. 23,24,083 in the year preceding. As in the year 1919-20, 8 arts colleges were maintained by Government, 1 was under municipal management, 13 were aided, and 14 unaided. During the year under review each college cost Rs. 73,935 on an average. The average cost per student was Rs. 127-13-0 towards which Provincial revenues contributed Rs. 48-14-7.

Arts Colleges for Men.

Number of
colleges.

16. As in the previous year, the number of arts colleges for the education of men stood at 33; 7 of them were managed by Government, 1 by a Municipal Board, and 25 by private associations.

Number of
students.

17. Students in arts colleges for men fell from 21,380 to 19,576; of these 16,909 were Hindus, 2,306 Muhammadans, and 361 of other communities. The figures for the preceding year were 18,745; 2,332, and 303.

Expenditure.

18. The arts colleges for men cost Rs. 3,23,779 in excess of the expenditure of the preceding year. Towards the total expenditure Provincial revenues contributed Rs. 9,58,641; while Rs. 7,823; Rs. 13,40,569, and Rs. 2,62,601 came from Municipal funds, fees and other sources respectively.

Special grants
for private
colleges.

19. Seventeen private colleges participated in the recurring Imperial grant of Rs. 1,29,000 for the improvement of college libraries and laboratories. Fourteen non-Government colleges received grants-in-aid for maintenance and capital grants.

Government
Colleges :—
(1) Presidency
College.

20. On the 31st March 1921 the Presidency College had 869 students against 832 on the 31st March 1920. Seven hundred and twenty-eight were Hindus, 138 Muhammadans, and 3 of other communities. The total direct expenditure amounted to Rs. 4,76,849, of which Rs. 3,51,631 came from Provincial revenues. The average cost per student was Rs. 525-11-10, of which Rs. 387-10-11 was borne by Government.

Certain new features of the college work call for comment. An attempt was made to give the first-year students some special training of tongue and ear, with a view to improving their pronunciation, intonation and understanding of English. For this purpose small groups of students were practised in reading, dictation and conversation. Secondly, to give the first-year arts students a glimpse into science, a few science lectures illustrated by slides were given at different times. It is intended to repeat both the experiments in future years. The seminars flourished generally, and proved their value. Discipline among the students was satisfactory, and they did not join in the agitation at the close of the year. The College, it is true, was closed during some part of the disturbances, but merely because the strain placed upon students continuing their work in Calcutta was intolerable, and work was impossible in the midst of the agitation. The sense of civic duty in the students was high, and about 150 volunteered to work in connexion with the census operations, when the college accepted responsibility for the census of the ward in which it is situated.

21. There were in Dacca College on the 31st March 1921, 729 students against 754 of the year before. Five hundred and fifty were Hindus and 179 Muhammadans. The college cost Rs. 2,67,523 by way of direct expenditure, towards which Provincial revenues contributed Rs. 2,07,015. The cost per student was Rs. 341-10-7, of which Rs. 264-6-2 was borne by Government. To facilitate the inauguration of Dacca University, the Intermediate classes of Dacca College were separated from the B.A., B.Sc. and M.A., M.Sc. classes (which were absorbed later in Dacca University) and located in August 1920 in the building previously occupied by the School of Engineering. It was found necessary to expel 12 students who, in defiance of authority, joined the non-co-operators.

(2) Dacca College.

22. Hooghly College had on its rolls 247 students on the 31st March 1921 against 255 in the previous year. Two hundred and fourteen were Hindus, 31 Muhammadans, 2 Christians. The total direct expenditure amounted to Rs. 86,714, of which Rs. 67,014 came from Provincial revenues. The cost per student was Rs. 348-3-11, of which Rs. 269-2-1 was borne by Government. The College is cramped for space; in the picturesque language of the Officiating Principal: "the college is tight-laced and can hardly breathe". The Hooghly College Association, composed of staff and students, which was started last session, is reported to have done excellent work in the direction of social service; the members of the Association visited neighbouring villages, and impressed upon the people the necessity of self-help, education, temperance, and sanitation. They also started a night-school for working men, and remitted Rs. 800 for relief to the people of flooded areas in Midnapore. Discipline on the whole was satisfactory. Three students left the hostel, and 2 abandoned the Intermediate Examination as a result of non-co-operation propaganda.

(3) Hooghly College.

23. The Sanskrit College had 191 students against 290 in the year before. The decrease is said to be mainly due to restrictions imposed upon admissions by the Calcutta University and the Department owing to insufficiency of accommodation. Of the students 2 were Buddhists and the rest Hindus. The total direct expenditure on the College amounted to Rs. 37,609, towards which Provincial revenues contributed Rs. 24,818. The average cost per student was Rs. 181-10-11 out of which Rs. 119-14-3 was borne by Government. According to present arrangements, the students, who take up Honours in Philosophy and History, are allowed to join the Honours classes of the Presidency College without any additional charge, and the Principal of the Sanskrit College is of opinion that a similar concession should be extended to a limited number of honours students in Mathematics. During the year the post of the Principal was included in the Indian Educational Service. With the staff lately strengthened it has been found possible to introduce the system of lectures and monthly examinations. With the permission of the Principal the Presidency College grounds are used by the Sanskrit College students for sports for one day in the week, but this arrangement is not considered satisfactory. Dr. Thomas, Librarian of the India Office, paid a visit to the Sanskrit College library, and investigated its Sanskrit manuscripts.

(4) Sanskrit College.

24. On the 31st March 1921, Krishnagar College had 227 students against 281 of the previous year. Two hundred and four were Hindus, 22 Muhammadans

(5) Krishnagar College.

and 1 Christian. The direct expenditure amounted to Rs. 91,429, towards which Provincial revenues contributed Rs. 68,013. The cost per pupil was Rs. 365-11-5, of which Rs. 272-0-10 was borne by Government. The B.Sc. classes had their maximum strength, and many applications for admission to science were rejected. The ratio of the staff to students was 1 to 14. In the B.A. and I.Sc. Examinations held in 1920-21 there were no failures. In the Inter-University Recitation contest held by the Calcutta University Institute in 1920, two students won the first prize in Sanskrit, and another won the third prize in Bengali. Athletics flourished, and the students were required to attend the College field four days a week, as in previous years. There were a few cases of indiscipline.

Chittagong
College.

25. On the 31st March 1921 there were in the Chittagong College 321 students as compared with 405 of the year before. The decrease is ascribed to the non-co-operation movement. Two hundred and two were Hindus, 97 Muhammadans and 22 of other communities. Sanction was received to the affiliation of the College in Philosophy up to the B.A. (Pass) standard. The total direct expenditure was Rs. 76,616, of which Rs. 45,242 came from Provincial revenues. The cost per pupil was Rs. 197-7-5 towards which Provincial revenues contributed Rs. 116-9-8. A College Co-operative Stores run by representatives of both staff and students was started and is said to be working satisfactorily. A tennis court was laid out and football was played, but the interest in games was little owing to the non-co-operation agitation. No serious indiscipline came to notice. The senior Professor of English, who used to take an active interest in the affairs of the college, resigned his appointment in March 1921 and entered local politics as a non-co-operation leader.

Rajshahi
College.

26. Rajshahi College had 842 students on its rolls against 800 of the preceding year. Six hundred and fifty-six were Hindus and 186 Muhammadans. The direct expenditure amounted to Rs. 1,34,196, of which Rs. 56,429 was borne by Provincial revenues. The cost per student was Rs. 159-3, and the Government share of this was Rs. 66-15. The affiliation of the College up to Honours in Arabic has been under the consideration of the University. A new hostel for Hindu students is under construction. Sanction has been accorded to the construction of an additional college building at an estimated cost of Rs. 80,000, towards which Rs. 32,000 will be contributed by the Raja of Highapatia. An endowment of Rs. 2,50,000 in $3\frac{1}{2}$ per cent. Government promissory notes has been created for the college in terms of the will of late Mr. Basanta Kumar Roy for "making arrangements for the advanced teaching of Botany, Zoology, etc., with a view to the introduction of a higher agricultural course in the Rajshahi College." Two additional lecturers—one in English and one in Arabic and Persian, one additional Demonstrator in Chemistry, and an additional Librarian were sanctioned. A room has been fitted up at the Government Agricultural Farm where about 40 students of the college attend lectures, and learn the practical work of farming. It is compulsory on students to join in some form of physical exercise; and in consequence the football, cricket, hockey, tennis, rowing and gymnastic clubs flourished. Good discipline was maintained throughout the year, in spite of the non-co-operation agitation which failed here. The endowed Sanskrit College attached to Rajshahi College in which there are arrangements for teaching English, continued to work well.

Municipal
College.

27. Midnapore College is the only college in Bengal managed by a municipality. On the 31st March 1921 the college had 174 students against 207 of the previous year. One hundred and sixty-four were Hindus, 8 Muhammadans, and the rest of other communities. Besides the annual maintenance grant the college received Rs. 4,000 from the Imperial assignment of Rs. 1,29,000 for laboratory equipment. The total direct expenditure on the college was Rs. 25,185 and the cost per student Rs. 147-4-6.

Aided colleges.

28. As in the year before, the number of aided private colleges was 12 with 6,419 students on the 31st March 1921 against 6,817 of the preceding year. Of these 5,473 were Hindus, 685 Muhammadans and 261 of other communities. Of the total direct expenditure of Rs. 6,70,127, Rs. 1,37,022 was borne by Provincial revenues. The average cost per student was Rs. 103-2, towards which Provincial revenues contributed Rs. 21-1-5.

29. The preliminaries in connexion with Dacca University were almost all settled in the course of the year although the University came into being after the period closed. The proposals of the University Commission with regard to Calcutta University were taken into consideration, but for financial reasons no action was taken.

Dacca University.

30. The outstanding feature of the year was the rise and progress of the non-co-operation movement. Waves of emotional feeling flooded the colleges towards the close of the year, and for a time brought normal activity to an end in most centres. Then the students of Bengal, after long indifference, responded to the appeal of Mr. Gandhi to abandon an alleged "foreign" system of education for a "national" system. The "national" system when brought to the test of detail, turned out, where it existed at all, to be uncommonly like the "foreign" system. Private colleges which depend mostly upon fees, became a special target of the agitators. The prospects of a National College were dangled before the students' eyes, already dissatisfied with the present system of education, and they were induced to withdraw from their colleges in large numbers. In many places the students took themselves very seriously regarding themselves as "redeemers of their country," in others the movement partook somewhat of the character of a "students' rag," meeting a psychological need of the young adolescent under tutorial discipline. The students, for instance, of one unaided college in Calcutta are reported to have damaged the hostel furniture, while professing non-violent principles. Many who left their colleges adopted a novel method of picketing by lying at full length at the entrance of the colleges and of the University in order to dissuade others from paying their fees or sitting for their examinations. The embarrassment was serious for a time, but even so, activity was confined to a minority, and by the close of the year colleges had reopened, and the national colleges not having materialised, all but the bolder spirits, or those who had little to lose or had committed themselves beyond recovery, were stealing back to work, with an uneasy feeling that they had been made ridiculous.

Unrest among students.

CHAPTER IV.

Secondary Education.

31. *Secondary schools of all grades and types fell from 2,800 to 2,741 ; the decrease was solely confined to middle schools for boys. The number of pupils declined from 397,987 to 360,060. The secondary schools cost Rs. 1,04,87,312, as compared with Rs. 1,00,31,351 in the year before. The average cost of a secondary school was Rs. 3,826-1-9, and the cost per pupil Rs. 28-7-1.

General statistics.

Secondary Education for Indian Boys.*

32. The number of secondary schools for Indian boys declined from 2,689 to 2,626. High schools rose from 869 to 874 ; middle schools fell from 1,820 to 1,752. Of the 47 middle English schools which disappeared, some were raised to the high school status; some converted into junior madrasahs ; others closed for financial reasons ; a few were nationalised. The 21 middle vernacular schools disappeared, because there is now little demand for purely vernacular education. The decrease in secondary schools brought about a reduction in the number of pupils. High schools lost 26,222, middle English schools 10,453, and middle vernacular schools 1,718 pupils. The loss in high and middle English schools is attributable chiefly to the non-co-operation agitation, though the long-continuing economic stress is also an explanation. It is satisfactory to note that the tide of the non-co-operation movement ebbed considerably after the close of the period ; pupils are returning to schools, and it is expected that normal conditions will soon be restored.

Schools and pupils.

* The Secondary Education of Indian girls and Europeans is dealt with in the respective chapters.

Expenditure.

33. The total direct expenditure on secondary schools for Indian boys amounted to Rs. 88,06,478, of which Rs. 12,91,604 was borne by public funds, and Rs. 75,14,874 by private sources. In the preceding year, public and private funds contributed Rs. 11,19,319 and Rs. 74,64,557. High schools cost Rs. 66,39,087 ; middle English schools Rs. 20,16,964 ; middle vernacular schools Rs. 1,50,427. Expenditure increased in high and middle English schools ; decreased in middle vernacular schools.

General outlook.

34. The position of the headmasters of Government high schools has been improved considerably by their inclusion in the Bengal Educational Service. The bulk of the teachers of secondary schools managed by Government are in the Subordinate Educational Service and Lower Subordinate Educational Service in which the pay is inadequate and the prospects of promotion unsatisfactory. The Subordinate Educational Service Reorganisation Committee have recommended a time-scale of pay in place of the present graded system ; the matter is receiving the attention of the Department. By far the majority of secondary schools are under private management, and their condition is not satisfactory. They are numerically and financially weak, and poor in house and equipment. Secondary schools often spring up quite apart from any genuine demand, and disappear after a few years' struggle. The progress of private secondary schools received a set-back last year owing to the non-co-operation agitation, and some were helped by Government with additional grants to keep themselves financially alive. There is much popular dissatisfaction with the present curriculum which is almost purely literary. The voice of the people demands " vocational training ", and the *charka*, to which magical virtues are attributed, is knocking at the door of schools. *Aut scientia aut nihil* is the motto of many a student applying for admission to a college. An early modification of the curriculum is a necessity, though it is to be hoped that the new can be admitted, without destroying what was good in the old. Funds will be required to meet the need, and this may be a cause of delay. Additional funds are also necessary to help the schools in maintaining a high standard of efficiency generally. There is a strong desire in the country for the restoration of the middle vernacular examination. Facilities for training should also be augmented ; at present only 10 per cent. and 28 per cent. of the teachers employed in high and middle schools are trained. A Board has been recently created for controlling secondary and intermediate education within the area of Dacca University. A similar Board for the whole province is aspired to, but is not a near probability.

Manual instruction.

35. A new manual training class was opened in the East Indian Railway High English school at Asansol. In some of the manual training classes in the Chittagong Division, weaving, carpentry, smithy, bamboo and canework, tailoring and rope-making are taught. The non-co-operation movement has led to the introduction of spinning and weaving into many schools, though in several cases the machines have gradually ceased to be used, and has in general helped to convert parents to the view that manual instruction is an essential part of secondary education. On the other hand it has undermined the pupils' respect for their teachers and elders so that perhaps little has been gained educationally, and much lost.

CHAPTER V.**Primary Education.****General statistics.**

36. On the 31st March 1921 there were 47,772 primary schools for boys and girls with 1,456,865 pupils against 46,240 schools and 1,409,814 pupils of the preceding year. These schools cost Rs. 51,56,394 as compared with Rs. 49,45,625 of the year before. The average cost of a primary school was Rs. 107-15 and per pupil Rs. 3-11-9.

Primary Education of Indian Boys.*

37. Primary schools for Indian boys rose from 34,856 to 35,695 or by 839. Of these 3,070 were upper primary, and 32,625 lower primary against 3,131 upper primary and 31,725 lower primary of the preceding year. Thus lower primary schools increased by 900, while upper primary schools decreased by 61. The table below compares the number in each Division for the years 1919-20 and 1920-21 :—

	1919-20.		1920-21.		GAIN OR LOSS.	
	Upper Primary Schools.	Lower Primary Schools.	Upper Primary Schools.	Lower Primary Schools.	Upper Primary Schools.	Lower Primary Schools.

38. The year closed with 1,181,094 pupils (including 58,180 girls) in primary schools for Indian boys as against 1,151,988 on 31st March 1920, that is, an increase of 29,106. Of the pupils 144,434 were in upper primary and 1,036,660 in lower primary schools. The corresponding figures for the previous year were 146,580 and 1,005,408. It is reported that pupils of upper primary schools decreased in all Divisions except Rajshahi, while those in lower primary schools increased everywhere except in the Presidency Division outside Calcutta. The decrease of pupils is said to be due to economic distress and the prevalence of malarial fever in certain localities. It is reported further that primary schools were in no way affected by the non-co-operation agitation. Besides the pupils attending primary schools for Indian boys, there were in the primary department of secondary schools 159,755 pupils, as compared with 175,156 of the previous year. Pupils in primary schools for boys and in primary stages of secondary schools together therefore numbered 1,340,849 against 1,327,144 returned for the previous year, showing an increase of 13,705 in the primary stages.

39. Primary schools for Indian boys were attended by 537,398 Hindus and 620,469 Muhammadans. The corresponding figures for the preceding year were 532,104 and 598,507. Thus the number of Hindu pupils rose by 5,294 or '9 per cent. and of Muhammadan pupils by 21,962 or 3'6 per cent. Of the total male Hindu population 5'09 per cent. and of the Muhammadan population 5'06 per cent. were in primary schools. In the previous year the percentages were 5'05 and 4'88.

40. The total direct expenditure on primary schools for Indian boys was Rs. 42,96,750, against Rs. 41,55,666 of the year preceding, an increase of Rs. 1,41,084. Of the direct expenditure Rs. 21,47,121 or 49'9 per cent. came from public funds, Rs. 21,49,629 or 50'1 per cent. from private sources. In the preceding year public and private funds contributed 48'9 and 51'1 per cent. of the total expenditure. The expenditure from public funds is made up of Rs. 14,20,470 contributed by Provincial revenues, and Rs. 6,42,308 and Rs. 84,343 by District and Municipal funds. The corresponding figures for the previous year were Rs. 13,48,841 Rs. 6,03,601 and Rs. 79,037.

41. The bulk of the expenditure on primary schools from public funds was met from the allotment sanctioned out of the various Imperial grants. The following paragraphs indicate briefly how much was made available during the year under review from each of the Imperial grants :—

The entire amount has been placed at the disposal of District and Municipal Boards for the maintenance of board primary schools and enhancement of the pay of teachers in aided primary schools.

*Primary education of Indian girls and Europeans is dealt with in the respective chapters.

Rupees 4,24,209 was made available during the year under review for expenditure on the various objects (except construction of buildings for *guru* training schools) specified in the last annual report.

primary
schools.

42. Funds were allotted for the construction of 102 Panchayati Union schools for boys and 30 schools for girls. At the present rate of progress it will be long before every Panchayati Union has a school of the type. The condition of these schools is on the whole better than that of other primary schools, but the pay offered to the teachers is inadequate. The District Board of Dinajpur is reported to have increased the pay of the teachers of these schools by 30 per cent. on account of the high cost of living. Similar action by other District Boards would help to popularise these schools.

3a.

43. The revised curriculum for primary schools was issued during the year under review and will come into force in January 1923. The inclusion of English as an optional subject in the new curriculum will meet a long-felt want; the subject was already being taught surreptitiously in many schools. Precautions are, however, necessary, that the teaching of English may not be entrusted to inefficient teachers.

3n Act.

44. The most important feature of primary education during the year under review was the deputation of Mr. Evan E. Biss, a member of the Indian Educational Service, to work out schemes for the extension of primary education in urban and rural areas. His report, which has attracted much attention, was placed before Government subsequent to the close of the period under review. As an outcome, detailed schemes for 35 municipalities and 23 Union Boards were worked out. Municipalities hesitate to commit themselves to any large expenditure. The main difficulty lies in the levying of a cess which is an essential feature of the proposals. The schemes for the following municipalities and union boards were, however, submitted to Government for sanction :—

- (1) A scheme of free primary education in the Rangpur Municipality ; Rs. 6,000 was sanctioned by Government for capital expenditure.
- (2) A scheme for the Chandpur Municipality—it is under the consideration of Government.
- (3) A scheme for three Union Boards in the district of Khulna—Rs. 10,000 has been sanctioned by Government for capital expenditure, of which Rs. 8,000 was paid out during the year.
- (4) A scheme for primary education in the Darjeeling District, towards which Government sanctioned a sum of Rs. 25,000 for capital expenditure.

45. Mr. Dunn's report on the survey of primary schools in Calcutta had been before Government for some time past, and during the year Government decided to pay to the Corporation of Calcutta 16½ lakhs by instalments for the improvement of primary schools in the town. A sum of Rs. 3 lakhs was paid out during the year.

46. The general condition of primary schools in Bengal remains unchanged. The average income of a primary school teacher is much below that of a day-labourer ; it is idle to expect real progress while the present state of things continues. Increase in the number of aided primary schools—which takes place year after year—without corresponding increase in the funds available for the remuneration of the teachers naturally leads to a reduction in the small pittances doled out to them. There are now millions of boys who go without any education. Illiteracy may be broken to

some extent, when effect has been given to the provisions of the Primary Education Act, but the cost of giving free primary education to all boys of school-going age will be enormous. The trend of feeling is against local taxation for the purpose. A complete system of primary education must, therefore, it seems, be to a very considerable extent financed by Government, or submit to indefinite postponement.

CHAPTER VI.

The Training of Men Teachers.

47. Teachers in Bengal are broadly divided into (1) Anglo-vernacular or English teachers of secondary schools; the graduate and under-graduate teachers amongst them are trained in the two Government Training Colleges at Calcutta and Dacca; (2) vernacular teachers of secondary schools who are trained in the Divisional normal schools; (3) vernacular teachers of primary schools, who are trained in the existing *guru* and *muallim*-training schools.

Classification
of teachers.

48. Institutions for the training of men teachers for Indian schools were 114 against 119 of last year, with 2,711 pupils as compared with 2,694. The decrease was due to the abolition of old-type *guru*-training schools in certain localities. Of training institutions, 2 are training colleges, 6 normal schools, and 106 *guru*, *muallim* and special training schools.

Institutions
and pupils.

49. The two training colleges maintained by Government at Calcutta and Dacca prepare students for the B.T. and L.T. examinations of the Calcutta University. They admit annually a few Sub-Inspectors and Deputy Inspectors of Schools and a small number of outsiders, besides teachers of Government and aided secondary schools. The course extends over 10 months. Both institutions are rapidly advancing in popularity.

Training
Colleges.

50. On the 31st March 1921, the college had 45 students—25 in the B.T. and 20 in the L.T. class, although 29 B.T. and 27 L.T. students had been admitted at the beginning of the session. Of the number admitted 9 were inspecting officers, 12 Government school teachers, 21 teachers of aided schools and 14 outside candidates. The falling-off in numbers was due to withdrawal caused by illness, resignation, insufficient preparation and shortage of attendance. In the B.T. examination 25 students appeared and 19 passed, 15 in the 1st division. Twenty sat for the L.T. examination, and 13 were successful. One B.T. candidate was deputed by the State of Cooh Behar and 2 L.T. candidates by the State of Hyderabad. The college cost Rs. 42,626 during the year. The average cost per student was Rs. 906-15.

(1) David Hare
Training
College.

The college and its attached hostel were removed to a three-storied building near Harrison Road, the top floor of which is occupied by the Hindu boarders. The Muhammadan boarders reside in the Carmichael Hostel. Special courses were arranged in drawing, drill and geography, the last-named being compulsory. Tutorial classes in history, geography and mathematics were continued for L.T. students. The Principal has proposed that Bengali should also be included in the list of subjects for practical teaching. The arrangements made in previous years for practical training were continued. A course of lectures on hygiene was delivered by an officer of the Department of Public Health.

51. The year closed with 77 students—49 B.T. and 28 L.T. on the rolls of the Dacca Training College; 50 B.T. and 29 L.T. students had been admitted at the beginning of the session. One B.T. student left for political reasons and 1 L.T. student on account of ill-health. Of the B.T. students 2 were women. Of the number under training 10 were inspecting officers, 29 Government school teachers, 11 teachers of aided schools, 23 outside candidates, and 4 officers deputed by the Hyderabad State. Forty-seven students appeared at the B.T. examination and 35 passed, 14 in the first division. Twenty-eight students sat for the L.T. examination and 16 passed. The total direct expenditure on the college was Rs. 72,131, towards which Provincial revenues contributed Rs. 69,071, the balance being met from other sources. The average cost per student was Rs. 924-12-1.

(2) Dacca
Training
College.

As in the previous year the practical work was conducted in the Dacca Collegiate and Armenitola High Schools; the practice of granting honoraria to selected teachers of both schools for supervising the work of the teachers under training was continued. The students also attended the lectures delivered at the social service exhibition and a bioscope exhibition illustrating the "Montessori Method" and other educational topics.

Training
schools for
vernacular
teachers.

52. Training schools for vernacular teachers were 6, as in the year before; of these 1 was maintained at Krishnagar by the Church Missionary Society with aid received from Provincial revenues. They had on their rolls 492 pupils on the 31st March 1921 against 492 of the preceding year. Total direct expenditure was Rs. 98,408, of which Rs. 95,925 was borne by Government and the balance of Rs. 2,483 was met from other sources; the figures for the preceding year were Rs. 97,573; Rs. 92,668 and Rs. 4,905. Of the 238 students who took the final examination 190 passed; the results were rather better than in the year before.

The qualification for entering the normal school is the middle school-leaving certificate, which is also demanded of teachers of primary schools admitted to higher grade *guru*-training schools. There is consequently a certain amount of over-lapping, though the courses prescribed are distinct. It is hoped that the proposed reform of the normal schools will do away with this anomaly, and provide for the training of the subordinate English teachers of secondary schools, who are not qualified to enter the training colleges. The scheme for opening at the Chittagong Normal School a supplementary training class for B. T.s and L. T.s referred to in the last annual report, has not yet materialised. The re-organisation of the normal schools is an urgent matter. The orders of Government on the question of increasing the value of the stipend paid in normal schools from Rs. 6 to Rs. 10 a month were received after the expiry of the period under review.

guru training
schools.

53. The year closed with 106 *guru* and special training classes against 111 on 31st March 1920. One hundred and two were managed by Government and 4 were aided. The number of *guru*-training schools maintained by Government decreased by 5; this is attributed to the closing of the old-type schools in certain localities. Students under training in the various *guru* and *muallim*-training schools were 2,097 against 2,102 in the year 1920. Out of 1,770 candidates who appeared in the final examination, 1,457 passed. The maintenance charges of these schools amounted to Rs. 2,72,096, towards which Government contributed Rs. 2,53,464. In the preceding year the figures were Rs. 2,38,747 and Rs. 2,14,649.

Buildings for *guru*-training schools of the improved type were completed at Faridpur, Sagardi and Munshiganj. Similar buildings are under construction at Patuakhali, Natore and Balurghat.

Conclusion.

54. The advantages derived from the *guru*-training school system are not what might be hoped. The annual outturn of trained *gurus* is too small to justify the expenditure involved in training them. The men recruited for training are not always of the right type. Many of the trained teachers also give up teaching and take to more remunerative occupations. These evils can only be remedied by increasing the present pay of the primary school teachers, so that the work may be more attractive.

CHAPTER VII.

Professional and Technical Education.

Law Colleges
and Classes.

55. Provision for the study of Law existed in the University Law College, Calcutta, and the Law classes attached to the arts colleges at Hooghly, Krishnagar, Dacca, Rajshahi, Chittagong, Berhampore and the Ripon College, Calcutta. The number of law institutions decreased by one as the pleaders' classes attached to the Midnapore College were discontinued. Law students numbered 2,502 on the 31st March 1921 against 2,939 students of the previous year; 2,274 were Hindus, 214 Muhammadans, and 14

of other communities. In 1919-20 there were 2,667 Hindus, 257 Muhammadans, and 45 of other communities. The law colleges and classes cost Rs. 2,83,679, of which Rs. 30,125 was met from Provincial revenues. At the B. L. final examination 1,576 students appeared, and 647 passed.

56. In Bengal, training classes for pleaders were held at the Bengal Engineering College and at Dacca. In the annual examination which was held in February 1921, 27 candidates appeared and 7 were successful.

Pleaders' Survey, Examination.

57. In consequence of the transfer of all technical and industrial institutions (except the Bengal Engineering College and the Ashanullah School of Engineering, Dacca) to the Industries Department, the following subjects are to be administered in future by the Director of Industries, Bengal:—

Subjects transferred to the Industries Department.

- (1) Amin Examination Board.
- (2) Joint Technical Examination Board.
- (3) Mining instruction in the coalfields.
- (4) City and Guilds Examination of London Institute.
- (5) State Technical Scholarships.

58. On the 31st March 1921 the Engineering Department of the College had 87 students against the same number in 1919-20. The Apprentice Department had 232 students against 245. The Artisan classes had 19 students against 40. Of these students 274 were Hindus, 16 Muhammadans, 46 Christians, and 2 of other communities. The total direct expenditure of the college, to which Provincial revenues contributed Rs. 2,37,604, was Rs. 2,67,744. The average cost per student was Rs. 883-10-3, of which Rs. 784-2-9 was paid from Provincial revenues. The approximate value of the work turned out in the college workshops was Rs. 23,819.

Bengal Engineering College.

59. Visiting Lecturers were appointed last session in Architectural Drawing, Waterworks, Drainage and Sewerage and Structural Engineering. The annual mining camp was pitched at Dishergarh. Under-ground survey was made and the surface arrangements, gas-testing, propping and the local geology were studied. The electrical students visited the Tata Steel and Iron Works, the Jamalpur Railway Workshops, the Calcutta Electric Supply Corporation Power House, the Calcutta Tramway's Power House and the Bengal Telephone Exchange. In the Chemical Department of the college a small number of B.Sc.'s were allowed to join the 2nd-year course direct. Two Sub-Assistant Superintendents of the Telegraph Department were deputed for the usual training; one of them failed at the preliminary examination and was rejected. An Assembly and Examination hall has been under construction. The situation of the college in regard to water-supply and drainage leaves much to be desired. A sum of Rs. 20,000 sanctioned by the Government of India towards the cost of equipment required for the college was spent. Three students left the college and one gave up practical training for political reasons. In the 2nd-grade Divisional Accounts Examination of the Public Works Department 166 students were registered, 157 appeared at the examination and 9 or 5·7 per cent. passed. The Government of India directed that the upper subordinate classes at the Engineering College should be discontinued.

60. The Ashanulla School of Engineering at Dacca had 302 pupils in its three departments. One hundred and thirty-four in the upper subordinate and 88 in the lower subordinate classes, 10 students in the survey class and 70 in the artisan department. The total direct expenditure on the school was Rs. 78,728, of which Rs. 66,622 was met from Provincial Revenues. The expenditure for 1920-21 exceeded that for the previous year by Rs. 17,168, an increase mainly due to the appointment of the new Assistant Principal and the increment in grade pay earned by certain members of the teaching staff. The total value of the work turned out by the school workshop was Rs. 3,170 for repairs to instruments, furniture and apparatus belonging to the school, and Rs. 1,734 for outside parties. There was no serious breach of discipline, although 7 students are said to have left the school for political reasons. The school with its workshop and hostel was removed to the building formerly occupied by the Secretariat Press. Government have sanctioned the creation of a post for the Assistant Principal of the School. The Engineering courses offered at the institution

Ashanulla School of Engineering, Dacca.

are very popular, and the question of duplicating the classes has been taken up. The Principal fears that passed students of the new three-year upper subordinate course will be somewhat inferior to those trained in the old four-year overseer course. The athletic side of the school was not neglected during the year under review, but at present the school does not possess a properly levelled ground for sports. The students of the upper and lower subordinate classes visited various works of engineering interest in and around Dacca, such as the new University buildings under construction, the Dacca sewerage works, etc. The School Employment Bureau was asked to recommend passed students for 30 vacancies last session.

classes.

61. There were "B" Classes at the Dacca and Rajshahi Collegiate Schools and the Zilla Schools at Khulna, Rangpur and Pabna. The total strength was 126 boys. Forty-three appeared at the final examination and 21 or 48·8 per cent. passed. It is hoped that the present public demand for a less literary type of education will help to popularise these classes neglected in the past.

CHAPTER VIII.

Education of Indian Girls and Women.

Situations.

62. Public institutions of all grades and classes for Indian girls were 12,199 on the 31st March 1921 as compared with 11,543 of the preceding year. These included 3 arts colleges, 1 training college, 13 high schools, 58 middle schools, 12,059 primary schools, 12 training schools, and 53 other special schools. The figures for the preceding year were 3, 2, 13, 54, 11,366, 10 and 95.

Site.

63. Pupils, including girls in mixed schools, rose from 322,992 to 340,536 or by 16,544. Of these 152,366 were Hindus, 180,092 Muhammadans, and 8,078 of other communities. It will be seen that the percentage of increase of Muhammadan girls was higher than that of Hindu girls.

controlling
agency.

64. As in the previous year, the women inspecting officers were two Inspectresses and 12 Assistant Inspectresses of Schools. Further additions to the inspecting staff are considered necessary.

Regulate
location—
as
Hoges.

65. The Bethune Collegé and the Collegiate School continued to occupy the same building, though the inadequacy of accommodation has been removed to some extent by the addition of a small building for science classes and the botanical laboratory. Increase of hostel accommodation for the college is urgently necessary. It is contemplated to organise subsidiary courses in scientific subjects and so to improve the girls' chances of admission into the Medical College. The girls visited various places of interest including the Botanical Gardens, the Exhibition of Indian Arts, and the Commercial Museum. Miss Wright speaks of the present bus arrangement in the following terms: "The working day of the non-boarders is cruelly prolonged by the long drive to and fro which they are obliged to take, and the impossibility of strict punctuality seriously impairs the value of the first lecture."

The number of students on 31st March 1921 was 111 against 89 of the previous year. Of these 96 were Hindus and 15 Christians. The total direct expenditure was Rs. 59,065, of which Rs. 52,809 was borne by Provincial revenues. The average cost per girl was Rs. 541-14-1, of which Rs. 484-7-10 was met from public funds.

The two other arts colleges for Indian girls were the Diocesan College and the Loreto House; the first is an aided institution. They had 35 and 16 pupils respectively on 31st March 1921.

Secondary
education—
high
schools.

66. As in the previous year, 4 high schools for Indian girls were maintained by Government and 9 were aided. They had 2,516 pupils on 31st March 1921 against 2,575 of the year before. The schools cost Rs. 3,15,844. Lectures in First Aid and Hygiene were given, as before, to the senior pupils of the Eden High School, Dacca, partly by Mrs. Collins and partly by Mrs. Bevan-Jones. The vernacular training classes attached to the Eden High School were removed to a separate house and placed under the direct

control of the Inspectress of Schools, Dacca Circle. The English training class was retained at the Eden High School. Special attention was paid to the teaching of needlework and hygiene in the Bethune Collegiate School. In the Vidyamoyee High School at Mymensingh lessons on First Aid, Infant Rearing, and Hygiene continued to be given; instrumental music was also taught. The Inspectress of Schools, Presidency and Burdwan Divisions, observes that hitherto all attempts of the authorities of higher secondary schools in her jurisdiction to deviate from the Matriculation course and to include in the curriculum some form of special training for girls have failed. She also refers to the dearth of Indian women capable of teaching Geography, Mathematics and Hygiene. The condition of physical education in girls' schools is as deplorable as before. Conveyance difficulties seem to increase with the increase of cost.

Of the 58 middle schools for girls 27 were middle English and the rest middle vernacular. Of the middle schools 5 were under public management and 53 were aided. The schools had 6,950 pupils against 6,463 of the previous year. The Inspectress of Schools, Presidency and Burdwan Divisions, states that the bulk of the middle schools in West Bengal have properly qualified staffs and are decently housed. The Binapani Girls' School, which was improved last year, has nearly 300 pupils. The work of some but not all middle schools in East Bengal is reported as satisfactory.

(2) Middle Schools.

67. Primary schools for Indian girls were 12,059, with 274,902 pupils on the 31st March 1921 against 256,915 of the year before. Of the pupils 114,293 were Hindus and 155,954 Muhammadans as compared with 110,547 and 142,152. Their cost was Rs. 7,83,124 against Rs. 7,22,312. The allotments available from the Imperial assignments for improving primary education of girls were devoted to the objects specified in the previous report. The following classes of primary schools deserve mention :—

Primary education.

- (a) Model Primary Schools for Girls :—the school house at Boichee has been under construction.
- (b) Urban Girls' Schools :—these are confined to Eastern Bengal.
- (c) Panchayati Union Schools for girls :—money was allotted for the construction of 30 schools during the year.
- (d) Home Girls' Schools taught by a single mistress who is given a monthly grant of Rs. 10.
- (e) Peasant Girls' Schools :—22 in number, all situated in the Presidency Division. Their condition is not wholly satisfactory.

On the 31st March 1921 there were 61 zenana teachers with 1,262 pupils. Some of the zenana classes in Eastern Bengal suffered considerably owing to the constant change of centres. The work was also hampered by the enormous increase in conveyance charges. Out of 33 centres in West Bengal 10 are purely for Muhammadan pupils. The Inspectress does not recommend an extension of the system, as the results achieved so far have not been very encouraging. The zenana agency at Krishnagar continued to do good work; here young married women of good families receive sound education. The scheme is expensive. It is inexpedient to gauge the value of zenana work merely by the amount of teaching accomplished; it offers other advantages, e.g., free exchange of views.

Zenana Education.

68. The training classes attached to the Diocesan College prepare Indian women for the B.T. and L.T. examinations of the Calcutta University. The Secondary Training College scheme approved by Government has been kept in abeyance as stated last year.

Training of teachers—
(a) Secondary training.

The number of institutions with facilities for the training of teachers of primary schools numbered 12. Of these institutions 4 are managed by Government and the rest receive aid from Provincial revenues. The Moslem Training class has been working. The Brahmo Training class presented candidates for the first time for the teachership examination. In the Hindu Widows' Training Institution at Ballygunge, accommodation is extremely limited. The Pandits' Training class, opened two years ago by the Assistant Inspectress of Schools, Calcutta, is doing valuable work. Its extension is under consideration. The training class for vernacular mistresses

(b) Primary training.

has been, as stated already, separated from the Eden High School and placed on a more satisfactory footing. The Wesleyan Mission at Bankura has decided to re-open the training class which was closed some years ago. There is a training class for Nepali girls at Kalimpong. The output of trained women teachers is in no way commensurate with the demand.

In Miss Brock's opinion it can be increased by either increasing the number of existing stipends or helping the United Missionary training class to develop. In West Bengal 24 girls passed the senior and 56 the junior Vernacular Teachers' Examination. At the teachers' examination held at the Eden High School 14 girls passed.

Needlework.

69. The peripatetic needlework teachers worked satisfactorily. The question of improving their pay and prospects is under consideration. A scheme has been worked out for making these posts permanent and pensionable, but effect has not yet been given to it for want of funds.

**Hygiene and
Nok nursing.**

70. Her Excellency the Countess of Ronaldshay offered a medal for this subject and an examination was held for the first time in the Dacca Circle. A complete course of hygiene, First Aid work and simple nursing has been drawn up as a part of the training for all vernacular teachers in West Bengal.

Bookery.

71. A diploma in this subject has been started in Eastern Bengal. The examination is both practical and theoretical. It is becoming increasingly popular.

Conclusion.

72. The education of Indian girls and women has made much progress with the financial assistance rendered by the Imperial Government, but much has yet to be done, and the two things necessary are an increased outturn of trained women teachers and the provision of decent school houses with quarters for mistresses. Progress in neither direction is possible without additional funds.

CHAPTER IX.

Education of Europeans.

Schools.

73. The year closed with 81 institutions for European children as against 81 (including the secondary Department of St. Andrew's Colonial Homes which was not developed completely, the figure was 82) on 31st March 1920. Of the total number 62 gave general instruction, and 19 trained pupils in special subjects. Of the schools for general instruction 14 were higher secondary, 7 secondary, 17 higher elementary, 7 elementary and 17 preparatory and ungraded schools. Of those for special instruction 17 were supplementary or technical classes attached to institutions giving general instruction. Three of the 81 schools were maintained by Government and the rest were managed by various denominations.

Pupils.

74. Pupils in European schools on the 31st March 1921 were 9,883 as compared with 10,106 of the previous year. This decrease may be attributed to the transfer of the Technical and Industrial Schools to the control of the Director of Industries; the statistics of these schools have been excluded from the returns of European schools. Of the pupils 5,375 were boys and 4,508 were girls, as compared with 5,585 boys and 4,521 girls of the previous year. The total number of pupils (boys and girls) in higher secondary schools was 3,767, in secondary schools 1,066, in elementary and preparatory schools 4,799; the figures for the previous year were 3,818; 1,035 and 4,782; 251 were under instruction in the special schools against 471. The European and Anglo-Indian pupils were 8,652 on the 31st March 1921, of whom 4,578 were boys and 4,074 girls compared with 4,806 boys and 4,210 girls on the 31st March 1920. The number of non-European pupils was 1,231 against 1,090 in the previous year; 797 were boys and 434 were girls.

Expenditure.

75. The total expenditure upon the education of European and Anglo-Indian children was Rs. 33,20,258 against Rs. 32,23,633 of the previous year.

Of this amount Rs. 12,21,926 represented direct and Rs. 20,98,332 indirect expenditure. The expenditure was appropriated as follows :—

	Rs.
Provincial revenues (including the allotments available from the Imperial grant).	10,17,293
Municipal funds	18,748
Ross	13,99,517
Endowments	1,34,175
Subscriptions, donations and other sources	7,50,525
Total	33,20,258

The amount of Rs. 1,67,000 available from the Imperial grants was utilised for enhancing the salaries of teachers.

76. Rupees 36,946 was spent on payment of scholarships including 13 awarded from the Doveton Trust Fund, against Rs. 32,741 of the previous year. This amount included as in the year before the sum spent on certain extra-provincial scholarships paid in Bengal. The Statescholarship of the year did not fall to Bengal. Scholarships were also awarded out of the Sussex Trust to 20 boys and 16 girls for study in India, and to 4 boys and 4 girls for study in the United Kingdom.

Scholarships

77. In consideration of the high cost of living the free boarding grant for each child was increased from Rs. 8 to Rs. 10 a month.

Free board grant.

78. On the last day of the year the staffs of European schools had 652 teachers against 644 of 31st March 1920. Of these 56 were graduates, 370 were trained and 282 were untrained. The figures for the previous year were 62,320 and 324.

Teachers.

79. The Government of Bengal deputed one European male teacher to Sanawar for training, as facilities for training European male teachers do not exist in this Presidency. Mistresses under training on 31st March 1921, in the training class for European women attached to the Dow Hill Girls' School, Kurseong, were 12 as compared with 6 of the previous year. In the annual examination of the training classes held in November 1920, four senior students passed out of 7 who appeared; of the five juniors five appeared, and three passed.

Training of teachers.

80. The number of higher elementary schools in which classes following the recognised supplementary courses were held was 16—5 for boys and 11 for girls. These classes had on 31st March 1921, 134 boys and 88 girls. Special classes for domestic training in plain cookery, and plain needle-work were held at Dow Hill school and St. Helen's Convent, Kurseong. Special classes for training probationary sick nurses were held, as before, at the Entally Convent and at St. Andrew's Colonial Homes, Kalimpong. The Calcutta Free School, Kidderpore House and St. Andrew's Colonial Homes at Kalimpong held classes for children's nurses. The domestic science subjects are examined only by the City and Guilds Examinations Committee.

Vocational training.

81. At the City and Guilds Examinations which were held as usual in November 1920 at Kurseong, for candidates from the Dow Hill School and St. Helen's Convent, 23 candidates appeared, eight in plain needle-work and 15 in plain cookery: of these five passed in the former and 11 in the latter subject.

83. Mr. Mercer who acted as Inspector of European Schools, Bengal, from June 1915 went home ill on leave in June 1920, and has since died in England. The post was held successively by Messrs. Papworth, Sterling and Oaten and latterly again by Mr. Papworth.

85. In January 1921 a conference was held under the presidency of Mr. J. W. Gunn, Assistant Director of Public Instruction, to consider the general question of elementary European education in the Province and the elementary school certificate and supplementary class final examinations in particular. A number of suggestions were made, and a sub-committee was formed to elaborate details. The main recommendation of the conference was the abolition of the present elementary certificate examination as unnecessary and harmful. Regrading of schools and the institution of special scholarship examination were also suggested. It is anticipated that early effect will be given to the recommendations.

CHAPTER X.

Muhammadag Eduoation.

sties of
hammadan
is.

86. The year closed with 925,844 Muhammadan pupils in all types of institutions as compared with 919,033 pupils returned in the last annual report on public instruction; the number of Muhammadan pupils therefore increased during the year 1920-21 by 6,811. The proportion of Muhammadan pupils to the total number in schools rose from 47·3 to 47·8 per cent. The proportion of Muhammadan students to the total number in arts colleges increased from 10·8 to 11·6 per cent.; in the professional colleges the proportion remained as before; in high schools it decreased further from 20·09 to 17·6 per cent.; in middle schools it decreased from 30·5 to 28·4; in primary schools it rose from 52·6 to 53·3; in special schools it increased from 64·9 to 71·1. The chief cause of the decrease in high and middle schools has been economic depression, though the Khilafat and non-co-operation agitation is also responsible for the falling-off. The increase of Muhammadan pupils

in arts colleges is rather illusory; the percentage rose, because the total number of students in arts colleges declined. The rise in primary schools was the outcome of natural causes. The increase of Muhammadans in special schools has been due to the opening of more junior madrasahs which adopt the reformed course, and of maktabas.

87. This table indicates the number of Hindu and Muhammadan pupils reading in all types of public and private institutions during the two years 1919-20 and 1920-21.

Hindu and Muhammadan pupils.

	MUHAMMADANS.			HINDUS.		
	Males.	Females.	Total.	Males.	Females.	Total.
1919-20	741,575	177,458	919,033	836,476	152,164	988,640
1920-21	737,799	188,045	925,844	816,908	155,388	972,296

It will be noticed that Muhammadans lost during the year under report 3,776 male, but gained 10,587 female pupils. Hindus lost 19,568 male but gained 3,224 female scholars. In male scholars Muhammadans lost 5, and Hindus 23 of their total male school population. In female scholars the gain of Hindus and Muhammadans were 59 and 21 of their total female school population.

88. The year closed with 342 madrasahs 14 senior and 328 junior with 27,231 pupils. In the previous year there were 316 madrasahs with 25,871 pupils. Junior madrasahs are increasing fast; the introduction of the reformed madrasah course which embraces both religious and secular instruction and the offer of liberal grants by the Department account for the increase. Pupils in madrasahs increased by 53 per cent. The total direct expenditure on all madrasahs was Rs. 6,44,080 of which Rs. 3,12,864 was met from public funds.

Madrasahs.

89. An additional provision of Rs. 35,000 was available during the year 1920-21 for maintenance grants to madrasahs adopting the reformed course.

Grants-in-aid to madrasahs.

90. The Junior Madrasah Examination was held in December 1920. Six hundred and fifty students appeared and 460 or 70.77 per cent. passed.

Junior Madrasah Examination.

91. Dacca and Chittagong have been the two centres for the Islamic Matriculation Examination. It was held in April 1920 for the second time at both centres. Fifty candidates appeared and 29 or 58 per cent. passed.

Islamic Matriculation Examination.

92. On the recommendation of the Advisory Board for the Special Islamic Matriculation and Intermediate Examinations certain modifications in the regulations for the Special Islamic Intermediate Examination were sanctioned by Government.

Islamic Intermediate Examination.

93. During the year the Darul-Ulam Madrasah at Dacca was temporarily recognised for a period of two years with effect from the 1st April 1920 for the purpose of sending up candidates to the Central Madrasah Examination.

Old scheme of madrasahs.

94. In 1917 a revised curriculum of studies for the Arabic Department was submitted to this office. The scheme, which includes among other things proposals for opening a Title class in Arabic literature in the Calcutta Madrasah has been referred to a representative committee.

Arabic Department, Calcutta Madrasah.

95. Maktabas—recognised and unrecognised—rose from 12,839 to 14,032 of which 9,753 were for boys and 4,279 for girls, with 395,451 pupils against 358,944 of the previous year. Of these 286,455 were boys, and 108,996 were girls. The figures for the previous year were 261,952 and 96,992. These maktabas cost Rs. 10,00,702 as compared with Rs. 8,97,720. To this expenditure public funds contributed Rs. 5,25,212 against Rs. 4,71,090 of the preceding year. Aided maktabas in District Board areas received, as in previous years, 50 per cent. grants in excess of what was given to aided primary schools.

Maktabas.

96. Concessions to Muhammadan pupils generally take the forms of reservation of seats in Government and aided schools, grant of special stipends and scholarships, and of free studentships to the extent of 15 per cent. of the total enrolment.

Special facilities for Muhammadans.

CHAPTER XI,

Education of special classes.

Education of
Chiefs and
nobles.

97. As in previous years the Nawab Bahadur's Institution at Murshidabad, which is managed by the Department, was the only institution specially intended for the education of boys of aristocratic family. Twenty-six boys of the Nizam family were pupils here. The institution cost Rs. 3,596 against Rs. 3,776 of the year before.

Education of
aborigines and
depressed
classes.

98. Although the economic stress continues, the zeal of the lower classes—the Pods and Namasudras particularly—to raise themselves in the social scale through education continues unabated. The progress of pupils belonging to backward classes in the different stages of education is described in the following paragraphs.

Presidency
Division.

In the district of 24-Parganas, more than 60 per. cent. of the pupils of backward classes come from the Pod community; and of 38 lower primary scholarships 12 were won by Pod boys. In Jessore 27 primary schools, chiefly for Namasudras, have been established by the society for the improvement of backward classes. An equal number of middle and primary schools for Namasudras exists in the district of Khulna. In Calcutta 4 schools for Chamar, Dom, and Mehtar children were maintained by the Salvation Army. The Wesleyan Mission and the Church Missionary Society controlled 2 and 6 such schools. About 740 pupils of the depressed classes received instruction in ordinary schools along with children of other communities.

Burdwan
Division.

The Mission training school at Sarenga in Bankura for Sonthal teachers *worked well*. The number of primary schools for aborigines, viz., Sonthals, Mundas, Oraons and Kaoras was 270. Besides these there were 2 middle schools for boys and 2 for girls conducted by Missionary bodies. The society for the improvement of the depressed classes subsidised 17 schools including a middle English school in Burdwan.

Dacca
Division.

The school for the children of fishermen at Betuail in Dacca did not prove a success. Its grant of Rs. 216 a year has been transferred to a new school started at Bhutichandi. In addition to 3 schools for fishermen, viz., Rohitpur, Paragaon-Matabpur and Vitichandi, a free primary night school has been opened at Kayetpara. There were 8 free schools for Muchis and 17 schools for Namasudras in the Dacca district. In the district of Mymensingh 1 Middle English and 58 primary schools including 12 for girls existed specially for the depressed classes. There were 2 schools for Bunias in Faridpur. The District Board, Bakarganj, maintained 12 primary schools in the colonisation area of the Sundarbans where free tuition, higher stipends and special scholarships were offered; 3 middle, 3 upper primary and 11 lower primary scholarships were secured by depressed class pupils in the Dacca Division. The Depressed Classes Mission aided and supervised a number of primary schools in Dacca and Faridpur and supported 3 middle English schools in the Dacca district.

Chittagong
Division.

The Government High school at Rangamati and the training classes at Rangamati and Chandraghona were attended chiefly by aboriginal boys. The unaided high English school at Ramu also taught Magh boys. There were 3 schools—2 for boys and 1 for girls—for Doms in the Chittagong district. There were 4 Tipra schools in the district of Tippera. Noakhali had two lower primary schools for backward classes. Of the aboriginal pupils 2 obtained upper primary and 8 lower primary scholarships. Of the non-aboriginal boys 2 won middle English, 1 upper primary and 6 lower primary scholarships.

Rajshahi
Division.

The Rajshahi Division had 80 schools for hill tribes and other aboriginal races and depressed classes. Of these 1 was the Bhutia school at Chunabhati in Jalpaiguri. Twenty-nine of these were controlled by the Board of Sonthal Education, Dinajpur. Another school of some note was the Kerwalnut School at Saidpur, district Rangpur, managed by the Salvation Army. Pabna had 5 schools for Sonthals, Muchis and Dhobis. Of the successful depressed class boys 2 secured the middle, 4 the upper primary and 9 the lower primary scholarships.

99. The children's Home at Kurseong, referred to in the previous report, had on its rolls 9 European children. The school continued to do good work. The Deaf and Dumb School and the school for blind children at Calcutta have been transferred to the control of the Director of Industries. Dacca and Barisal had each a school for deaf and dumb children. The Dacca school taught 16 pupils including 6 girls. The school cost Rs. 1,391 of which Rs. 270 came from Provincial revenues. The Barisal school taught 17 pupils including 2 girls. The expenditure on this school amounted to Rs. 2,412 to which public funds contributed Rs. 1,164.

Education
defectives

100. There were 40 tea-garden schools with 584 pupils in Jalpaiguri. Of these 5 were 'A' class schools managed by Government, 22 'B' class schools which were aided, and 13 'C' class schools which were unaided. Government spent Rs. 2,276 on the 'A' and 'B' class schools. The District Board of Jalpaiguri spent Rs. 464 on the 'B' class schools.

Education
children &
gardens.

Darjeeling had 60 tea-garden schools with 1,323 pupils. The total expenditure on these schools amounted during the year under review to Rs. 8,794 to which Provincial revenues contributed Rs. 5,657.

101. The primary school at Titaghar opened specially for the children of mill employees, had 108 pupils on its rolls, and is doing well. It had a Hindi section for Hindu children and a Urdu section for Muhammadan children. It had two teachers, and received a grant of Rs. 60 a month. Children of mill operatives also attend ordinary primary schools situated in the mill areas of riparian municipalities in the districts of 24-Parganas, Howrah and Hooghly.

CHAPTER XII.

Private Institutions.

102. Private institutions, over which the Department has little control, decreased further from 2,259 to 1,974. This came about mainly in two ways :—some of the badly-managed institutions were converted into national schools in which the *charka* forms a prominent part of the curriculum; others were developed into recognised institutions and received aid from public funds. One special feature of the decline was that some schools teaching the more advanced course in arabic disappeared. As stated previously, all unrecognised *tols*, *koran* schools, and *kyungs* or monastic schools, are classified as private institutions. Of these the Sanskrit *tols* conform to a recognised standard in that they prepare candidates for the title examinations. The number of pupils attending private schools decreased during the year from 67,310 to 56,635. Of these 18,374 were Hindus, 36,305 Muhammadans, and 1,956 of other communities.

CHAPTER XIII.

Physical and Moral Training.

103. There were 899 hostels or boarding houses with 26,027 boarders; the figures for the preceding year were 911 and 27,973. Of the 899 hostels 84 were for girls, with 4,811 inmates. Hostels for males and their inmates decreased by 11 and 2,023, while girls living in hostels increased by 77, although the number of girls' hostels fell by one. The decrease in the number of boys residing in hostels is attributable mainly to two facts; the hostels attached to purely Technical and Industrial schools, which have passed under the control of the Industries Department, have been excluded from the scope of this report, and the sudden dislocation caused by the non-co-operation activities accounts for some loss. The conditions of hostels attached to private and unaided institutions leaves much to be desired, in sanitation, housing, and supervision. The Superintendents of hostels of Government

Hostels.

and aided schools and colleges are remunerated according to the scale prescribed by the Department; those of unaided institutions receive free board and lodging often at the expense of the boarders themselves.

The arrangements alluded to in previous reports for the accommodation of students in messes in Calcutta and Dacca were continued. At Dacca the task of making suitable residential arrangements for University students will pass shortly into the hands of the authorities of Dacca University. Control over students living in messes and "jaigirs" is generally unsatisfactory.

Physical
training.

104. No officer has been recruited to fill the post of whole-time adviser to the Department in Physical Education, and financial stringency will postpone his recruitment for some time yet. The Inspectress of Schools, Presidency and Burdwan Divisions, is of opinion that to deal effectively with the needs of girls' schools in physical training, a woman who has specialised in the subject should be appointed.

Games.

105. As was observed in the last report, football, cricket, hockey, badminton, and lawn tennis are the favourite games in town schools, while indigenous games are played in village schools.

Inter-school
contests.

In many cases inter-school matches are popular. In rural areas these ordinary games are practically suspended during the rains, when playing fields are flooded. The cost of games is met from fees levied upon the students. The schools and colleges in Calcutta are at a disadvantage in this respect, since playing grounds are few. Of the Calcutta colleges the Vidyasagar College athletic teams won renown. They toured up-country with great success.

106. Drill forms a part of the curriculum in all recognised schools, although there has been a tendency of late years to confine it to classes below the fourth. Lectures on Hygiene and Sanitation illustrated by lantern slides were delivered in some schools.

Religious and
moral
instruction.
Discipline.

107. Direct moral and religious instruction is given in madrasahs, makhtabs and Brahmo and Mission schools.

108. No serious breach of discipline occurred among school boys and college students during the first part of the year. The boycott resolution adopted at the students' conference at Nagpur brought educational life into entangling contact with politics and seriously undermined discipline with the consequence that many students challenged authority. The non-co-operation agitation, which was in full swing during the latter part of the year, induced many boys to leave schools and colleges. Some high schools were nationalised, and a number of national schools were started. Strikes occurred in many educational institutions, a University Law Examination was largely ruined, colleges and schools were picketed, and attempts were made at some centres during the Matriculation Examination to dissuade candidates from sitting. A number of candidates were duped or frightened into abstention. A Professor of English at Chittagong college and an assistant master of the Hare School resigned their posts out of sympathy with the agitators.

During the calendar year 1920, there were altogether 3 national schools against 4 of the preceding year, with 500 pupils as against 326. The attitude of the authorities of these schools towards the department was reported to be friendly and no unfavourable report has been received against any teacher or pupil for complicity in political crime.

The number of national schools which have been started as a result of the non-co-operation agitation is not definitely known. It has been stated to have been somewhat over 100 at the height of the movement. Some were short-lived. As many of these declined to give information the number of their pupils cannot be given.

CHAPTER XIV.

Conferences.

109. No conference presided over by the Director of Public Instruction, Bengal, was held during the year under review. but in January 1921 a conference was held under the presidency of Mr. J. W. Gunn, then Assistant

Director of Public Instruction for the purposes indicated in paragraph 85. Of the Divisional Inspectors one or two are reported to have held conferences at Divisional headquarters for, discussion of such questions as primary education, vocational education, training of teachers, admission and transfer rules.

CHAPTER XV.

Text-book Committees.

110. There are still two separate Text-Book Committees in the Presidency, at Calcutta and at Dacca. Several changes were made in the personnel of the Calcutta Text-Book Committee. The Calcutta Committee received 686 books including 54, the consideration of which was postponed at the General Committee's meeting held in December 1919. Of these 232 books were approved, 213 were rejected, 7 books were submitted to this office for disposal, and the remaining 234 were left over for later consideration. Of 899 books received by the Dacca Committee, 406 were approved.

The Committee which was appointed last year to advise Government on certain matters connected with the constitution and functions of text-book committees in Bengal submitted their report in due course. It is now under the consideration of Government.

CHAPTER XVI.

Education in the Reformed Council.

111. The new Legislative Council did not come into existence until nine months of the year under review had elapsed, and there is therefore little to report. Its interest in education was shewn by numerous questions and resolutions, and in particular an important debate on "Vocational Education," which reflected the recently aroused public interest in the subject, was initiated by Rai Mahendra Chandra Mitra Bahadur, M.L.C. His proposal was that special vocational classes should be opened in all Government and aided schools in Bengal, in co-ordination with the Agricultural and Public Works Departments, and authorities of workshops and mills, where possible. Government, while unable to accept the resolution in this form, welcomed its underlying principle, and an amended resolution was ultimately carried that steps be taken for preparing a scheme for the furtherance of vocational education, and that practical effect be given to such a scheme as early as possible. The debate indicated the universal feeling of members of Council that the prevalent literary type of education needs partial replacement by education of a technical and vocational nature, and that such modification will go far to solve the unemployment problem.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 14th June 1922.

Summary.—During the week monsoon conditions have been established almost throughout the province. The rainfall was heavy in the West Bengal districts and generally moderate elsewhere. It has facilitated the field operations and has improved the Prospects of standing crops generally. Sowing of jute is still progressing in certain West Bengal tracts. The progress of sowing, so far made, is unsatisfactory. Weeding continues. The average price of common rice for the Province has risen by about 1·63 per cent. as compared with that of the previous week.

To—The Financial Secretary to the Government of Bengal.

SUBJECT :—*Leave after attainment of the age of 55 years (Fundamental rules 56 and 86).*

As it has been brought to the notice of the Government of India that some doubt has been felt as to whether, with reference to fundamental rules 56 and 86, a formal extension of service is a necessary preliminary to the grant of leave to an officer who has attained the age of 55, I am directed to say that such an extension is not necessary and that the grant of leave under rule 86 automatically carries with it the extension required.

2. I am to add that fundamental rule 86 imposes no restriction such as was contained in article 234 of the Civil Service Regulations, upon the exercise by the local Government of its discretion in granting leave.

Notice.

THE Bengal and Madras Service Family Pension Fund which is provisionally managed and assisted by Government has for its object the provision of monthly pensions for the maintenance of the widows and children of subscribers and is open, with certain exceptions, to all active and pensioned members of the Uncovenanted Service of Government (except those serving under the Government of Bombay), and to Local Fund servants earning pensions from Government. Some of the special features of the fund are—(1) that widowed daughters incapable of remarriage or children labouring under such mental or bodily infirmities as incapacitate them from earning their livelihood or preclude the possibility of marriage (in case of a daughter) are admitted to its benefits; and (2) that subscribers to the Widows' and Daughters' branches are entitled to a refund of 30 per cent. of the premia paid, should the nominees predecease them after five years of admission. The second quinquennial valuation of the fund has been completed by the Actuary to the Government of India and his report discloses very favourable results. For forms of application and rules of the Fund apply to the Accountant-General, Central Revenues, Imperial Secretariat Buildings, Calcutta.

The annual interest is Rs. 37,079, which is banked with the Imperial Bank of India. The year opened with a cash balance of Rs. 14,467-5-1 and closed with one of Rs. 20,940-8-5.

III. **Election to Vacancies, etc.**—The annual election of wards was held on Tuesday, the 18th January. For the 12 vacancies advertised 32 applications were received and 12 girls were elected on the recommendation of a sub-committee consisting of the Ven. the Archdeacon of Calcutta, the Rev. Father A. Gille, S.J., the Rev. G. Henderson and Mr. Maurice Remfry. Of the girls elected, 10 were placed in the Loreto Convent, Entally (7 in the 1st, and 3 in the 2nd, Boarding School), 1 in the Calcutta Free School, and 1 in St. Paul's Mission Home.

(2) Of the girls withdrawn during the year, 16 attained the age of 17, the limit ordinarily allowed under the rules, 6 were withdrawn for other reasons, and 1 died.

(3) Of the girls who had been withdrawn during the preceding year, and in respect of whom reports have been received during the year under report, one is a child's nurse, one is in the Telephone Company, one is employed as Private Secretary in a Mercantile Firm, and two are employed as teachers. One girl is assisting in a Kindergarten Department, and intends after passing the Senior Cambridge Examination, to be trained for Kindergarten work. Two joined the Training College at Dow Hill, Kurseong.

(4) At the close of the year there were 82 girls on the rolls against 93 in the previous year. They were distributed as follows :—

	Total	82

(5) The following table affords particulars as to the class and religion of the wards at the close of the year:—

Class.	Roman Catholic.	Church of England.	Non-Conformists.	Total.
1. Orphans, or deserted by their parents ...	6	7	3	16

3. Those who have both parents alive ...	7	6	2	15
Total ...	45	25	12	82

The health of the wards was generally satisfactory. There was one death.

IV. **Education and Maintenance.**—The nature of the education given to the wards was that prescribed for Elementary and Higher Elementary Schools under the Code of Regulations for European Schools in Bengal, and in a few cases, for Secondary Schools.

(2) The Governors are anxious that their wards should not be allowed to drift until they leave school, and have accordingly asked the school authorities and the Visiting-Governor to report what the capacities and prospects of each girl are as she approaches the age of 15, and to advise them how the last two years or so of their school-life can be spent to the best advantage.

(3) Four wards were sent up for the Senior Cambridge Local Examination held in December 1920, but none passed. Five were sent up for the Junior Cambridge, of whom three passed. One was sent up for the Supplementary Final Examination and passed. Three were sent up for the Elementary School Certificate Examination and all passed, one gaining scholarship of Rs. 12 a month. Several wards appeared at the Cambridge Local Examinations held in December 1921; the results are not yet known.

(4) Under the rules, a girl is not ordinarily allowed to remain on the Fund after 17, when an outfit grant of Rs. 100 is generally given on application, to enable her to make a start in life. In cases where wards wish to be trained as teachers, and have the support of the school authorities, or where some other special training is recommended, or they are preparing for higher examinations, some extension of the period of benefit is generally allowed. Two wards were granted one year's extension to enable them to sit for the Senior Cambridge Local Examination. Short extensions of a few months were granted to two wards, one studying for the Elementary School Certificate Examination, the other learning shorthand and type-writing.

(5) The monthly average cost for the education and maintenance of each ward amounted to Rs. 25-12-6 against Rs. 26-7-9 in the preceding year.

(6) The amounts paid under the different heads of expenditure were as noted below:—

	1921.	1920.
	Rs. A.	Rs. A.
Education and Maintenance ...	32,163 0	33,300 7

Total ...	36,026 12	38,540 3

Total ...	57,740 3	

V. Inspection.—Mr. W. F. Papworth was appointed Visiting-Governor for the first-half, and the Lord Bishop of Calcutta for the second-half, of the year. They reported that the health and appearance of the wards were generally good, and that they were told that in general their conduct and progress had been satisfactory. Mr. Papworth suggested that with a view to facilitate the reviewing at any time of the position and progress of the wards, an inspection book be instituted which should contain necessary particulars from half-year to half-year. He further suggested that the Governors give very careful consideration to the ability, character, and progress of the wards, more specially with a view to their subsequent career by taking into account both the school authorities' and the Visiting-Governor's impressions of each ward when she is of an age when a transfer from one type of school to another might prove beneficial. Both suggestions were adopted.

VI. Meetings.—Four meetings were held during the year and among the various resolutions passed the following may be recorded :—

(1) That the financial position of parents or guardians be reviewed annually.

(2) That payment be made for wards who remain in school during the holidays, at the rate fixed by schools for other pupils, such payments not to exceed a total of Rs. 1,000 in any year.
